Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems Roman Barták, 2005-05-20 This book constitutes the refereed proceedings of the Second International Conference on Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems CPAIOR 2005 held in Prague Czech Republic in May/June 2005. The 26 revised full papers published together with an invited paper and abstracts of 2 invited talks were carefully reviewed and selected from close to 100 submissions. Methodological and foundational issues from AI, OR, and algorithmics are presented as well as applications to the solution of combinatorial optimization problems in various fields.

The Intonational Phonology of Swabian and Upper Saxon Frank Kügler, 2011-07-11 The study employs an autosegmental metrical model of intonation to propose an intonational grammar of Swabian and Upper Saxon German respectively. The analysis is guided by the assumption that each dialect exhibits a specific distinct intonation. The phonological analysis is comparative in nature: the implementation of accents are compared between the dialects in terms of tonal alignment and excursion. In fact, the phonetic data present evidence for the phonological analysis in that the individual tonal categories differ significantly from each other. In addition, a functional analysis of the intonation contours provides further evidence for the phonological analysis. Based on the assumption that nuclear contours convey intonational meaning, these meanings are analysed and compared. A certain meaning can be attributed to intonation contours that differ phonologically between the two dialects. However, the general shape of contours and its association with meaning has been proved to be identical in the two dialects and compared to a similar analysis of intonational meaning of British English. This comprehensive study of dialect intonation contributes to improve our understanding of intonational phonology.

Algorithmic Aspects in Information and Management Rudolf Fleischer, Jinhui Xu, 2008-06-17 This book constitutes the refereed proceedings of the 4th International Conference on Algorithmic Aspects in Information and Management AAIM 2008 held in Shanghai, China, in June 2008. The 30 revised full papers presented together with abstracts of 2 invited talks were carefully reviewed and selected from 53 submissions. The papers cover original algorithmic research on immediate applications and/or fundamental problems pertinent to information management and management science. Topics addressed are approximation algorithms, geometric data management, biological data management, graph algorithms, computational finance, mechanism design, computational game theory, network optimization, data structures, operations research, discrete optimization, online algorithms, FPT algorithms, and scheduling algorithms.
