Transnational Infrastructures and the

Transformation of Global Orders Hans-Jürgen Bieling,Thomas Diez,Riccarda Flemmer,Andrea Futterer,2025-05-22 This book offers a multidisciplinary insight into the significance of infrastructural change for global orders While infrastructures form the material basis of our everyday lives and their design and use determine the further development of our societies infrastructures themselves often remain invisible in everyday life Although they are and have always been subject to political conflicts their contestation often only becomes visible when the circulation of data goods and people is disrupted Rarely has this been more evident than at the moment when we are experiencing a multitude of overlapping global crises The threat of the nearing climate catastrophe shows us the inadequacies and climatic impacts of our energy and transport systems The Russian war of aggression in Ukraine and the subsequent energy crisis underline how dependent we are on infrastructures and how their political instrumentalization contributes to the escalation of conflicts The COVID 19 pandemic has further exposed the vulnerability not only of national infrastructures but also of global supply chains These crises illustrate twofold first they show that transnational infrastructures are no longer only deepening ties between individuals societies and states This was for long the hope of transnational actors Infrastructures may still stabilize global orders but they also foster their reconfiguration facilitating the establishment and rise of certain political actors and the decline of others Second these crises force us to ask about the significance of transformed infrastructures for global orders how this transformation manifested itself historically and how it is shaping the present and future alike What can a comprehensive understanding of the impact of infrastructures on global orders contribute to the challenges of the 21st century With this anthology we approach this question from different perspectives The book deals with infrastructures in different fields from energy to transport from communication to migration and at different levels of society local regional global What unites all the contributions is an interest in showing what the respective dynamics within and among these fields as well as the driving forces behind these developments mean for our society This book is aimed at a wide audience from infrastructure researchers to IR experts as well as from colleagues with expertise in specific policy fields to the general reader interested in the effects often invisible transnational infrastructures have on the organization of their everyday life

European Union Research Policy Veera Mitzner,2020-06-01 This book describes the emergence of research policy as a key competence of the European Union EU It shows how the European Community EC the predecessor of the EU which initially had very limited legal competence in the

field progressively developed a solid policy framework presenting science and research as indispensable tools for European economic competitiveness and growth. In the late 20th century Western Europe, hungry for growth and concerned about the American technological lead and keen to compete in the increasingly open international markets, the argument for a joint European effort in science and technology seemed plausible. However, the EC was building its new functions in an already crowded field of European research collaboration and in a shifting political context marked by austerity, national rivalries, new societal and environmental challenges, and emerging ambivalence about science. This book conveys the contested history of one of the EU's most successful policies. It is a story of struggle and frustration but also of a great institutional and intellectual continuity. The ideational edifice for the EC/EU research policy that was put in place during the 1960s and 1970s years proved remarkably robust. Its durability enabled the rapid takeoff of the European Commission's initiatives in the more favorable political atmosphere of the early 1980s and the subsequent expansion of the EU research funding instruments and programs that permanently transformed the European research landscape.

The Handbook of European Defence Policies and Armed Forces Hugo Meijer, Marco Wyss, 2018. This volume provides the first geographically and thematically comprehensive study of the evolution and current state of the national security and defence policies, strategies, doctrines, capabilities, and military operations, as well as the alliances and security partnerships of European armed forces.

Modernities, Memory and Mutations Abby Day, Mia Lövheim, 2016-03-03. Grace Davie, one of the world's most influential scholars in contemporary sociology of religion, has furthered a tradition developed by David Martin and others in comparative sociology of religion and modernity in European and international perspective. Davie's writings on belief and belonging, particularly in a context outside active Church participation, have contributed important understandings of the cultural role of religion as memory and practice in contemporary European societies. Through her most recent work on new roles of religion in relation to the political, legal, and welfare sectors of society, she has addressed debates on the resurgence of religion and the post-secular condition. *Modernities, Memory and Mutations* presents an overview and critical engagement with contemporary themes in the sociology of religion which will inform current and forthcoming generations of scholars. Reflecting on how Grace Davie's contributions have influenced their own work and wider debates in the field, leading international scholars engage with themes Davie has critically explored across religious studies and mainstream sociology, evolving a new research agenda for sociology of religion.

The Forgotten Realities of Men Marc Lafrance, Jean-Martin Deslauriers, Gilles Tremblay, Pauline Hoebanx, 2025-05-15. *The Forgotten Realities of Men* explores the complexities of contemporary masculinity, providing an empathetic look at men's lives while rejecting the politics of anger and resentment that often pit their challenges against those of women. Through in-depth research, ethnographic analysis, and interviews with men themselves, the contributors shed light on aspects of men's lived experiences that tend to be downplayed or overlooked: childhood sexual abuse, family violence, teenaged fatherhood, infertility, emotional expression, isolation, and depression. Cultures

of fear in sports and controversial online communities The Forgotten Realities of Men foregrounds the diverse circumstances characterizing men's lives and illuminates their impact on physical and mental health family dynamics professional responsibilities intimate relationships and personal identity By fostering respectful debate this compassionate collection serves as a call for solutions to many pressing issues facing men today

Work-Family Dynamics Berit Brandth, Sigtona Halrynjo, Elin Kvande, 2017-02-17 Work life integration is an increasingly hot topic in the media social research governments and in people's everyday lives This volume offers a new type of lens for understanding work family reconciliation by studying how work family dynamics are shaped squeezed and developed between consistent or competing logics in different societies in Europe and the US The three institutions of state family and working life and their under explored primary logics of regulation morality and economic competitiveness are examined theoretically as well as empirically throughout the chapters thus contributing to an understanding of the contemporary challenges within the field of work family research that combines structure and culture Particular attention is given to the ways in which the institutions are confronted with various moral norms of good parenthood or motherhood and ideals for family life Likewise the logic of policy regulation and gendered family moralities are challenged by the economic logic of working life based on competition in favour of the most productive workers and organizations Demonstrating different aspects of what is behind and between the logics of state regulation morals and market this innovative volume will appeal to students teachers and researchers interested in areas such as family studies welfare state studies social policy studies work life studies as well as and gender studies

Families and Personal Networks Karin Wall, Eric D. Widmer, Jacques-Antoine Gauthier, Vida Česnuitytė, Rita Gouveia, 2018-01-30 This book critically assesses the main features of the modernization of family life and personal relationships by examining and comparing three European countries with different social and political pathways Portugal Switzerland and Lithuania Drawing on national surveys of family trajectories and social networks the contributors highlight personal and family relationships through the lens of network and life course perspectives as well as gender and generational perspectives Providing innovative comparative findings on families and personal networks through the use of diverse methodologies this edited collection will be of interest to scholars students and policymakers across a range of social science disciplines
