the 50 case histories commences with a straightforward description following a woman through the clinical presentation of a particular condition. Along the way important points in clinical examination and diagnosis, complications, investigations and management are incorporated into the text as a conversation with the reader and essential points are highlighted in boxes. Being an Australian author, team tips are included for those junior doctors faced with obstetric or gynaecological problems in a smaller metropolitan or rural setting. Facilities for care and the advice of senior practitioners may be more limited in such surroundings and different care paths may be more appropriate, especially in remote parts of Australia. An app with multiple choice questions is available through the App Store and Google Play.
