Universalising International Law C.G. Weeramantry, 2004-04-01 Universalising international law is one of the most urgent tasks awaiting those who wish to advance the discipline Though all the world acknowledges its universal nature it has long been confined in a largely monocultural mould Indeed a tendency is sometimes discernible for international law to be compartmentalised and to function within a close cabinet of technical rules little known to those outside the ranks of specialists This volume looks initially at some general aspects of universalisation It thereafter adopts a universalist approach to some of the sources of international law and it deals with peace the bedrock of international law which likewise requires a universalist approach It is hoped that these studies will highlight the imperative need that now exists for extending the conceptual framework of international law thereby buttressing its moral authority and widening its appeal at a time when universal acceptance of international law is one of the most pressing demands of the

Self-Help, Private Debt Collection and the Concomitant Risks Cătălin Gabriel Stănescu, 2015-08-25 The book shows that self help in commercial law is a fast inexpensive and efficient alternative to court enforcement Self help remedies and private debt collection are largely but not exclusively features of common law jurisdictions since remnants of private enforcement can still be found in contract law in civilian systems The book argues that despite their usefulness self help and private debt collection entail significant risks especially for consumer debtors This means that private enforcement needs to be accompanied by the introduction of tailor made consumer debtor protection regulation Specific attention is given to factoring which functions in many instances as a form of pseudo private debt collection and which has been exploited to bypass sector specific consumer protection regulations

Practice and Theory in Comparative Law Maurice Adams, Jacco Bomhoff, 2012-07-05 A collection of essays exploring the gap between theory and practice in comparative legal studies

The Jurists James Gordley, 2013-10 Jurists or legal scholars have had a profound impact on the development of the law Their emergence can be traced back to ancient Rome and traced through the centuries to today Since their inception jurists have worked in like minded schools united by the particular project they were pursuing The project can be described by the goal they sought and the methods they used to achieve it These projects were heavily influenced by their historical context and as such they pursued different goals by different methods This proved helpful to later jurists who used the writings of previous schools to learn from both their successes and their failures However there was one crucial element that all jurists throughout the ages have had in common their attempts to understand and explain the law This book is an intellectual history of the work of Western jurists from ancient Rome to the present It describes how

the law has been reshaped by the work of these successive schools For each school the book introduces its emergence within its historical context the prevailing aims and methods of scholars working in it and its legacy for legal thought and scholarship

Economic Analysis of the DCFR Filomena Chirico, Pierre Larouche, 2010-03-12 The Economic Impact Group
EIG was created to support the work on the DCFR with insights from law and economics It brings together a number of leading European law and economics scholars The Group looked at the main elements of the DCFR with two questions in mind from an economic perspective is it sensible to harmonize private law across Europe for this specific element and is the solution chosen in the DCFR optimal This book presents the outcome of the work of the EIG It deals with key issues such as the function of contract law contract formation good faith non discrimination specific performance versus damages standard contractual terms and consumer protection in contract law The EIG complements the work of the drafters of the DCFR with insightful and critical assessments based on the well established law and economics literature

Unjustified Enrichment
David Johnston, Reinhard Zimmermann, 2005-01-28 Unjustified enrichment has been one of the most intellectually vital areas of private law There is however still no unanimity among civil law and common law legal systems about how to structure this important branch of the law of obligations Several key issues are considered comparatively in this 2002 book including grounds for recovery of enrichment defences third party enrichment as well as proprietary and taxonomic questions Two contributors deal with each topic one a representative of a common law system the other a representative of a civil law or mixed system This approach illuminates not just similarities or differences between systems but also what different systems can learn from one another In an area of law whose territory is still partially uncharted and whose borders are contested such comparative perspectives will be valuable for both academic analysis of the law and its development by the courts
