Remaking the Economic Institutions of Socialism Victor Nee, David Stark, 1989 To what extent can contemporary socialist economies be reformed by the introduction of markets The question is usually debated in either a Chinese or an East European context this collection of eleven essays is unique in taking the first steps toward a comparative analysis Twenty years of experience with reforms in Hungary and a decade of experimentation with reforms in China provide a critical mass of evidence for analyzing the problems endemic to centrally planned economies and the dilemmas faced in efforts to reform them In reflecting on the Chinese and East European experiences these essays trace the shift from a conception of reform as a mix of planning and markets within the state sector to a socialist mixed economy with implications for the emergence of new social groups and autonomous social organizations The essays exemplify a new perspective in the study of state socialism that changes the focus from ideologies to economic institutions examining how the activities of subordinate groups place limits on the power of state elites The authors include scholars who have shaped debates in Eastern Europe and whose work is now stimulating much discussion in China as well as representatives of a younger generation of economists sociologists and political scientists writing on the basis of field research recently conducted in factories cities and villages in China and Eastern Europe The contributors are Włodzimierz Brus Walter D Connor Zhiren Lin Victor Nee Susan Shirk David Stark Ivan Szelenyi

Wellisz,2013-04-15 The Solidarity led government which came into power in Poland in Autumn 1989 faced two enormous tasks First to stabilize an economy prone to hyperflation Second to replace a crumbling command system in favour of a market mechanism in a country whose market institutions had been destroyed under forty years of communist rule This book recounts the events of this period and the course taken by the new government and analyzes the significance of this for the transition process in Poland and elsewhere **Problems of Communism** ,1990 *Between Politics and Markets* Yi-min

Lin,2001-12-17 Between Politics and Markets examines how the decline of central planning in post Mao China was related to the rise of two markets an economic market for the exchange of products and factors and a political market for the diversion to private interests of state assets and authorities Lin reveals their concurrent development through an account of how

industrial firms competed their way out of the plan through exchange relations with one another and with state agents He argues that the two markets were mutually accommodating that the political market grew also from a decay of the state's self monitoring capacity and that economic actors' competition for special favors from state agents constituted a major driving force of economic institutional change

The Soft Budget Constraint — The Emergence, Persistence and Logic of an Institution Gun Eriksson Skoog, 2013-04-18 This is a story of the soft budget constraint It seeks an answer to a paradox: the prevalence of the soft budget constraint in spite of the tremendous inefficiencies that it gives rise to and its persistence in spite of reform of the system of which it is an integral part The story aims at increasing our understanding of why the phenomenon exists By studying the case of state in Tanzania before, during and after socialism an explanation of the owned enterprises' emergence, persistence and logic of the soft budget constraint is suggested This introductory chapter presents an argument showing why this story is worth telling It discusses the research topic and how the problem it presents is attacked

THE SOFT BUDGET CONSTRAINT The soft budget constraint is today a popular metaphor Originally it was seen as a characteristic of the socialist system It refers to the tendency of primarily state owned enterprises to have their liquidity gaps or losses accommodated by the state or some other external funding body and to the resulting expectations of such bail out The concept was coined by the Hungarian economist Hmos Kornai He distinguishes between four major forms of external financial assistance that contribute to the soft budget constraint: soft subsidies, soft taxation, soft credit and soft 2 administrative pricing

The Order of Economic Liberalization Ronald I. McKinnon, 1993-10 Can knowledge of financial policies in developing countries over four decades help the socialist economies of Asia and Eastern Europe become open market economies in the 1990s In all these countries the loss of fiscal and monetary control has often resulted in high inflation that undermines the liberalization process itself In the second edition of *The Order of Economic Liberalization* Ronald McKinnon builds on his influential work on the liberalization of financial markets in less developed countries and outlines the progression necessary to move from a repressed to an open economy New to this edition are chapters that contrast the gradual Chinese approach to liberalizing domestic and foreign trade with the big bang approach followed by some Eastern European countries and republics of the former Soviet Union Financial control and macroeconomic stability McKinnon argues are more critical to a successful transition than is any crash program to privatize state owned industrial assets and the banking system
