Fitzmaurice, Irma Taavitsainen, 2008-08-22 This volume represents a timely collective review and assessment of what it is we do when we do English historical pragmatics or historical discourse analysis. The context for the volume is a critical assessment of the assumptions and practices defining the body of research conducted on the history of the English language from the perspective of historical pragmatics broadly construed. The aim of the volume is to engage with matters of approach and method from different perspectives accordingly the contributions offer insights into earlier communicative practices registers and linguistic functions as gleaned from historical discourse. Speech Acts and Clause Types Peter Siemund, 2018 This book is an introduction to the relationship between the morphosyntactic properties of sentences and their associated illocutionary forces or force potentials The volume begins with several chapters dedicated to important theoretical and methodological issues such as sentence and utterance meaning illocutionary force clause types and cross linguistic comparison The bulk of the book is then composed of chapter length case studies that systematically investigate typologically prominent clause types and their forces such as declaratives and assertions interrogatives and questions and imperatives and commands These case studies begin with an overview of the necessary theoretical foundations followed by a discussion of the grammatical structures of English and an assessment of the relevant cross linguistic facts Each chapter ends with a succinct summary of the most important findings practice exercises and recommendations for further reading and research Overall the book works towards developing a gradient model of clause types that goes substantially beyond the traditional distinction between major and minor clause types It draws on insights from linguistics philosophy and sociology and may be used as a

textbook for undergraduate or graduate courses in semantics pragmatics and morphosyntax **Doubts and Directions in Translation Studies** Yves Gambier, Miriam Shlesinger, Radegundis Stolze, 2007 Like previous collections based on congresses of the European Society of Translation Studies EST this volume presents the latest insights and findings in an ever changing ever challenging domain The twenty six papers carefully chosen from about 140 presented at the 4th EST Congress offer a bird s eye view of the most pressing concerns and most exciting vistas in Translation Studies today The editors final choices reflect a focus on quality of approach originality of topic and clarity of presentation and aim at capturing the most salient developments in the contemporary theory methodology and technology of TS As always in EST the themes covered relate to translation as well as interpreting They include discussion of a broad range of text types and skopoi and a diversity of themes such as translation universals translation strategies translation and ideology perception of translated humor translation tools etc Many of the papers force us to take a fresh look at seemingly well established paradigms and familiar notions while also making recourse to work being done in other disciplines Semiotics Linguistics Discourse Analysis Contrastive Studies **Speech, Writing, and Thought Presentation in 19th-century Narrative Fiction** Beatrix Busse, 2020 The present study investigates speech writing and thought presentation in a corpus of 19th century narrative fiction including for instance the novels *Frankenstein* *Jane Eyre* *Wuthering Heights* *Oliver Twist* and many others **The Oxford Handbook of Grammaticalization** Heiko Narrog, Bernd Heine, 2011-10-13 This book presents a critical assessment of research on grammaticalization a central element in the process by which grammars are created Leading scholars discuss its core theoretical and methodological bases report on work in the field and point to directions for new research They represent every relevant theoretical perspective and approach *Intonational Morphology* John C. Wakefield, 2020-04-09 This book discusses the morphological properties of intonation building on past research to support the long recognized relationship between the functions and meanings of discourse particles and the functions and meanings of intonation The morphological status of intonation has been debated for decades and this book provides evidence from the literature combined with new and compelling empirical evidence to show that specific intonational forms correspond to specific segmental discourse particles Based on the conclusion that intonation is in the lexicon it proposes syntactic positions for intonational meanings using a cartographic approach It also describes how intonation is represented in speakers minds which has important implications for first and second language acquisition as well as for theories and approaches to artificial speech recognition and production This book is of interest to theoretical and applied linguists as well as to anyone whose research and interests relate in any way to intonation **The Morphosyntax of Imperatives** Daniela Isac, 2015 This book studies the properties of imperative clauses in the context of a theory of Universal Grammar Daniela Isac argues that the specificity of imperative clauses cannot be the result of a unique imperative Force feature instead the type of imperative clauses can be traced back to a plurality of finer grained features such as Modality and phi features hosted by the Mod Infl

and Speech Event heads among others The data are drawn from a wide range of languages including various Romance Slavic and Germanic languages as well as Finnish and Inuktitut The analysis accounts for recurrent patterns in the interaction of imperative mood with phenomena like negation restrictions on grammatical subjects and the possibility of embedding imperative clauses The approach which focuses exclusively on morphosyntactic rather than semantic features is potentially transferable to the analysis of other clause types such as exclamatives interrogatives and declaratives

Modality and Theory of Mind Elements across Languages Werner Abraham, Elisabeth Leiss, 2012-05-29 Modality is the way a speaker modifies her declaratives and other speech acts to optimally assess the common ground of knowledge and belief of the addressee with the aim to optimally achieve understanding and an assessment of relevant information exchange In languages such as German and other Germanic languages outside of English this may happen in covert terms Main categories used for this purpose are modal adverbials modal particles and modal verbs Epistemic uses of modal verbs like German *sollen* cover evidential reportative information simultaneously providing the source of the information Methodologically description and explanation rest on Karl Bühler's concept of *Origo* as well as Roman Jakobson's concept of *shifter* Typologically East Asian languages such as Japanese pursue these semasiological fundamentals far more closely than the European languages In particular Japanese has to mark the source of a statement in the declarative mode such that the reliability may be assessed by the hearer The contributions in this collection provide insight into these modal techniques

The Oxford Handbook of Modality and Mood Jan Nuyts, Johan van der Auwera, 2016 This handbook offers an in depth and comprehensive state of the art survey of the linguistic domains of modality and mood An international team of experts in the field examine the full range of methodological and theoretical approaches to the many facets of the phenomena involved Following an opening section that provides an introduction and historical background to the topic the volume is divided into five parts Parts 1 and 2 present the basic linguistic facts about the systems of modality and mood in the languages of the world covering the semantics and the expression of different subtypes of modality and mood respectively The authors also examine the interaction of modality and mood mutually and with other semantic categories such as aspect time negation and evidentiality In Part 3 authors discuss the features of the modality and mood systems in five typologically different language groups while chapters in Part 4 deal with wider perspectives on modality and mood diachrony areality first language acquisition and sign language Finally Part 5 looks at how modality and mood are handled in different theoretical approaches formal syntax functional linguistics cognitive linguistics and construction grammar and formal semantics
