Information Control Problems in Manufacturing 2004 (2-volume Set) Peter Kopacek, Gerard Morel, Carlos Eduardo Pereira, 2005-08-12 **Journal of Dynamic Systems, Measurement, and Control** ,1999 *Triangular Orthogonal Functions for the Analysis of Continuous Time Systems* Anísa Deba, Gautam Sarkar, Anindita Sengupta, 2011 This book deals with a new set of triangular orthogonal functions which evolved from the set of well known block pulse functions BPF a major member of the piecewise constant orthogonal function PCOF family Unlike PCOF providing staircase solutions this new set of triangular functions provides piecewise linear solution with less mean integral squared error MISE After introducing the rich background of the PCOF family which includes Walsh block pulse and other related functions fundamentals of the newly proposed set such as basic properties function approximation integral operational metrics etc are presented This set has been used for integration of functions analysis and synthesis of dynamic systems and solution of integral equations The study ends with microprocessor based simulation of SISO control systems using sample and hold functions and Dirac delta functions **Systems Approach to Management of Disasters** Slobodan P. Simonovic, 2011-03-21 The main goal of this text is to introduce the systems approach to disasters management community as an alternative approach that can provide support for interdisciplinary activities involved in the management of disasters The systems approach draws on the fields of operations research and economics to create skills in solving complex management problems The text is organized into four parts Part I provides an introductory discussion of disaster management including an overview of the main terms used Part II is devoted to the introduction of systems theory mathematical formalization and classification of methods The material presented in this section should be of practical relevance during the process of selecting an appropriate tool for the solution of a problem Part III is technical in nature providing a simulation approach and a detailed description of system dynamics simulation This section details two areas of application flood evacuation simulation and disaster risk assessment Part IV ends with a chapter covering steps to improve disaster management Finally parts of the book can be used as a tool for specialized short courses for practitioners For example a course on System analysis for emergency management optimization could be based on Chapters 3 4 and parts of Chapter 6 Included in the book is a CD with three computer programs Vensim PLE LINPRO and COMPRO Vensim PLE Personal Learning Edition is state of the art simulation software used for the implementation of system dynamics simulation The other two programs are LINPRO a linear programming optimization tool and COMPRO for the implementation of the multi objective analysis tool of compromise programming *Technology for Large Space Systems* ,1990 **European Control Conference 1991** ,1991-07-02 Proceedings of the European Control Conference 1991 July 2 5 1991 Grenoble France **NASA Scientific and Technical Publications** ,1991 **Real Time Digital Control Applications** A.
