US approach toward China in the maritime domain in order to highlight potential avenues of foreign policy action that may enable the two countries to mitigate the risk of conflict This book will be of much interest to students of naval history maritime security US foreign policy and international relations *The Constitution and the Conduct of American Foreign Policy* David Gray Adler, Larry Nelson George, 1996 In this provocative and readable volume eleven leading constitutional authorities challenge business as usual in American foreign policymaking For far too long they contend Americans have acquiesced to presidential claims to sweeping executive powers in foreign affairs thanks to imperial minded presidents a weak willed Congress and neglectful scholars These authors forcefully argue that the president is not the supreme crafter of foreign policy and that Congress must provide more than a rubber stamp for the president s agenda Unilateral presidential control of foreign relations they warn can pose a grave threat to our nation s welfare and is simply without constitutional warrant Combining constitutional theory with keen historical insights these authors illuminate the roots of presidential abuse of executive power and remind us of the past and potential costs of such disregard for our unique system of checks and balances An essential guide for all concerned citizens and members of Congress this volume should help revive a proper understanding of this crucial dimension of American democracy
