Country Life Of Britain In The 70s:

The Country Life Book of Britain in the Seventies Ronald Allison, 1980 Terrorist bombings the election of a woman prime minister and the emergence of punk rock are covered in a detailed look at British culture history politics and lifestyles during the 1970s [The Australian Country Girl: History, Image, Experience](#) Catherine Driscoll, 2016-03-23 The Australian Country Girl History Image Experience offers a detailed analysis of the experience and the image of Australian country girlhood In Australia country girl names a field of experiences and life stories by girls and women who have grown up outside of the demographically dominant urban centres But it also names a set of ideas about Australia that is surprisingly consistent across the long twentieth century despite also working as an index of changing times For a long period in Australian history well before Federation and long after it public and popular culture openly equated Australian character with rural life This image of Australian ness sometimes went by the name of the bush man now a staple of Australian history This has been counterbalanced post World War II and increased immigration by an image of sophisticated Australian modernity located in multicultural cities These images of Australia balance rather than contradict one another in many ways and the more cosmopolitan image of Australia is often in dialogue with that preceding image of the bush This book does not offer a corrective to the story of Australian national identity but rather a fresh perspective on this history and a new focus on the ever changing experience of Australian rural life It argues that the country girl has not only been a long standing counterpart to the Australian bush man she has more importantly figured as a point of dialogue between the country and the city for popular culture and for public sphere narratives about Australian society and identity [Martin & Riaz - Conversations in Facebook Vol 1](#). Memorylands Sharon Macdonald, 2013-07-18 Memorylands is an original and fascinating investigation of the nature of heritage memory and understandings of the past in Europe today It looks at how Europe has become a memoryland littered with material reminders of the past such as museums heritage sites and memorials and at how this memory phenomenon is related to the changing nature of identities especially European national and cosmopolitan In doing so it provides new insights into how memory and the past are being performed and reconfigured in Europe and with what effects Drawing especially though not exclusively on cases concepts and arguments from social and cultural anthropology Memorylands argues for a deeper and more nuanced understanding of the cultural assumptions involved in relating to the past It theorizes the various ways in which materializations of identity work and relates these to different forms of identification within Europe The book also addresses questions of methodology including discussion of historical ethnographic interdisciplinary and innovative methods Through a wide range of case studies from across Europe Sharon Macdonald argues that Europe is home to a much greater range of ways of making the past present than is usually realized and a greater range of forms of historical consciousness At the same time however she seeks to highlight what she calls the European memory complex a repertoire of prevalent patterns in forms of recollection and past presencing The examples in Memorylands are drawn from both the margins and metropolitan centres from the relatively small scale and local the national and the avant garde The book looks at pasts that are potentially identity disrupting or difficult as well as those that affirm identities or offer possibilities for transcending national identities or articulating more cosmopolitan futures Topics covered include authenticity temporalities embodiment commodification nostalgia and Ostalgie the musealization of everyday and folk life Holocaust commemoration and tourism narratives of war the heritage of Islam transnationalism and the future of the past Memorylands is engagingly written and accessible to general readers as well as offering a new synthesis for advanced researchers in memory and heritage studies It is essential reading for those interested in identities memory material culture Europe tourism and heritage
