Countryside Ideal Anglo American Images Of Landscape:

The Countryside Ideal Michael Bunce, 2005-10-26 Draws together diverse images of landscape to explore the historical processes shaping our continuing attachment to the countryside seen in artistic expression attitudes to nature country life and the development of rural and urban land

Future Nature W.M. Adams, 2004-04-26 The countryside is changing faster than ever Fifty years of conservation achievements in the UK are now being confronted by a new complexion of economic forces that are driving change in the countryside At the same time new ideas in conservation are altering the role that conservation is being asked to play in negotiating the transition from past to future This revised edition of Bill Adams classic work *Future Nature* tackles the new challenges in the countryside and wildlife conservation head on through a new Introduction and Postscript with updated arguments about naturalness and our social engagement with nature and complemented by a new Foreword by Adrian Phillips Concepts such as biodiversity and sustainability and changes in our understanding appreciation and concern for nature offer unprecedented opportunities Bill Adams explores the scientific cultural and economic significance of conservation He argues that conservation must move beyond the boundaries of parks and reserves to embrace the whole countryside The importance of conservation for the future is enormous It holds the potential to create new spaces for nature both in the landscape and in our lives and imaginations This factual beautifully written and thought provoking book offers a fundamental reassessment of conservation its importance and how to achieve it Published with BANC

The Next Rural Economies Greg Halseth, Sean Patrick Markey, David Bruce, 2010 This book discusses the future of rural development and the recognition of the growing importance of place based economies where the unique attributes and assets of individual places determine their attractiveness for particular types of activities and investments New understandings of competitiveness and conceptualizations of a new economy underline the importance of making strategic investments in community infrastructure Doing things at the local and regional scales matters and not doing things has consequences Topics include seasonal economies amenity migration IT industries green energy and transportation developments

Love Strong as Death J.I. Little, 2010-10-30 A transcription of Lucy Peel s wonderfully readable journal was recently discovered in her descendent s house in Norwich England Sent in regular installments to her transatlantic relatives the journal presents an intimate narrative of Lucy s Canadian sojourn with her husband Edmund Peel an officer on leave from the British navy Her daily entries begin with their departure as a young newlywed couple from the shores of England in 1833 and end with their decision to return to the comforts of home after three and a half years of hard work as pioneer settlers Lucy Peel s evocative diary focuses on the semi public world of family and community in Lower Canada s Eastern Townships and fulfils the same role as Susanna Moodie s writings had for the Upper Canadian frontier Though their perspective was from a small privileged sector of society these genteel women writers were sharp observers of their social and natural surroundings and they provide valuable insights into the ideology and behaviour of the social class

that dominated the Canadian colonies during the pre Rebellion era Women s voices are rarely heard in the official records that comprise much of the historical archives Lucy Peel s intensely romantic journal reveals how crucially important domesticity was to the local British officials Lucy Peel s diary like those of such counterparts as Catherine Parr Traill also suggests that genteel women were better prepared for their role in the New World than Canadian historians have generally assumed *Town and Country Planning in the UK* J. B. Cullingworth,Vincent Nadin,2002 This thirteenth edition has been completely revised to take into account all the changes that have occurred in British planning including the policies introduced by the Labour government devolution innovations and the European Union **A Comparative Political**

Ecology of Exurbia Laura E. Taylor,Patrick T. Hurley,2016-05-26 This book is about politics and planning outside of cities where urban political economy and planning theories do not account for the resilience of places that are no longer rural and where local communities work hard to keep from ever becoming urban By examining exurbia as a type of place that is no longer simply rural or only tied to the economies of global resources e g mining forestry and agriculture we explore how changing landscapes are planned and designed not to be urban that is to look function and feel different from cities and suburbs in spite of new home development and real estate speculation The book s authors contend that exurbia is defined by the persistence of rural economies the conservation of rural character and protection of natural ecological systems all of which are critical components of the contentious local politics that seek to limit growth Comparative political ecology is used as an organizing concept throughout the book to describe the nature of exurban areas in the U S and Australia although exurbs are common to many countries The essays each describe distinctive case studies with each chapter using the key concepts of competing rural capitalisms and uneven environmental management to describe the politics of exurban change This systematic analysis makes the processes of exurban change easier to see and understand Based on these case studies seven characteristics of exurban places are identified rural character access local economic change ideologies of nature changes in land management coalition building and land use planning This book will be of interest to those who study planning conservation and land development issues especially in areas of high natural amenity or environmental value There is no political ecology book quite like this neither one solely focused on cases from the developed world in this case the United States and Australia nor one that specifically harnesses different case studies from multiple areas to develop a central organizing perspective of landscape change **Seasonal Landscapes** Hannes Palang,Helen Sooväli,Anu

Printsmann,2007-05-24 Seasonality is so obvious that it is typically omitted from landscape research It is expressed both in the natural rhythms of the landscape and in human lifestyles This book opens new perspectives on how seasons are perceived by people and societies in different parts of the world it offers interdisciplinary perspectives on seasonality research and discusses its applications to planning Rural Racism Neil Chakraborti,Jon Garland,2013-05-13 Rural issues are currently attracting unprecedented levels of interest with the debates surrounding the future of traditional rural customs and practice

becoming a significant political concern However the problem of racism in rural areas has been largely overlooked by academics practitioners and researchers who have sought almost exclusively to develop an understanding of racism in urban contexts This book aims to address this oversight by examining notions of ethnic identity otherness and racist victimisation that have tended to be marginalised from traditional rural discourse

Which People's War? Sonya O. Rose, 2003 *Which People's War* examines how national belonging or British national identity was envisaged in the public culture of the World War II home front Using materials from newspapers magazines films novels diaries letters and all sorts of public documents it explores such questions as who was included as British and what did it mean to be British How did the British describe themselves as a singular people and what were the consequences of those depictions It also examines the several meanings of citizenship elaborated in various discussions concerning the British nation at war This investigation of the powerful constructions of national identity and understandings of citizenship circulating in Britain during the Second World War exposes their multiple and contradictory consequences at the time It reveals the fragility of any singular conception of Britishness even during a war that involved the total mobilization of the country's citizenry and cost 400 000 British civilian lives

Englishness Revisited Floriane Reviron-Piégay, 2020-10-27 What is Englishness Is there such a thing as a national temperament is there a character or an identity which can be claimed to be specifically English This collection of articles seeks to answer these questions by offering a kaleidoscopic vision of Englishness since the eighteenth century a vision that acknowledges stereotypes while at the same time challenging them Englishness is defined in contrast to Britishness the Celtic fringe Scotland in particular Europe and the Continent at large The effects of the Empire and of its loss are examined together with other socio economic factors such as the two World Wars de industrialization and the different waves of immigration Through a careful analysis of the arts literature philosophy historiography cultural and political studies produced in England and on the Continent over the last three centuries a composite image of Englishness emerges somewhere between centre and periphery tradition and innovation transience and timelessness rurality and urbanity commitment and isolation Englishness is thus revealed as a protean concept one which whether it is a historical or political construct a genuine emanation of a national desire or a simulacrum retains its fascination and this volume offers keys to understanding its diverse expressions

Rural Europe Keith Hoggart, Richard Black, Henry Buller, 2014-02-25 Examines the interaction of the economic political and social change processes within Europe which are bringing about fundamental transformations in rural areas The authors expand on this view of rural Europe and place its significance within the broader field of rural studies

The Rural-urban Fringe in Canada Kenneth B. Beesley, 2010

Landscape and History since 1500 Ian D. Whyte, 2004-03-03 *Landscape and History* explores a complex relationship over the past five centuries The book is international and interdisciplinary in scope drawing on material from social economic and cultural history as well as from geography archaeology cultural geography planning and landscape history In recent years as the author points out there has

been increasing interest in and concern for many aspects of landscape within British European and wider contexts This has included the study of the history development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies economic and social structures cartography art and literature There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally Further Ian D Whyte argues changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe

Nature-based Tourism in Peripheral Areas Colin Michael Hall, Stephen W. Boyd, 2005-01-01 Nature based Tourism in Peripheral Areas provides a comprehensive examination of this form of tourism development as it occurs within alpine forest sub polar island coastal and marine environments This book goes beyond much of the debate surrounding ecotourism and the impacts of tourism in vulnerable environments to place nature based tourism in a wider regional context particularly when for many peripheral regions tourism remains one of the key opportunities for economic development Therefore a central theme that is present throughout many of the chapters is the role that nature based tourism can play as the catalyst for larger regional development of regions The book will serve as essential reading to senior undergraduate and postgraduate students taking courses in tourism and related degrees where the major focus is on tourism that occurs within peripheral regions It will also serve as a key reference to researchers and professionals interested in the role of tourism as a regional development tool

American Green Stephen Germic, 2001-01-01 In this work of interdisciplinary scholarship Stephen A Germic reveals how America's first parks both urban and wilderness were created and organized to mitigate the most threatening social and economic crises in the nineteenth century outside of the Civil War Germic analyzes the intentionally disguised relationship between the constructed nature of Central Park Yosemite and Yellowstone and the expanding but crisis prone capitalist state American Green demonstrates how the fundamental function of these parks was economic and political in the service of maintaining a consensus regarding national identity The organization and control of natural space Germic argues is inseparable from its function as a capitalist instrument This instrumentalism served not only to define constitute and segregate social groups but also to promote racial and ethnic identifications above those based on class interest Providing a fresh insight into United States labor cultural and environmental history this book is an important contribution to our understanding of American parks and the complex meaning of American public space

American Green Stephen A. Germic, 2001-05-25 In this work of interdisciplinary scholarship Stephen A Germic reveals how America's first parks both urban and wilderness were created and organized to mitigate the most threatening social and economic

crises in the nineteenth century outside of the Civil War Germic analyzes the intentionally disguised relationship between the constructed nature of Central Park Yosemite and Yellowstone and the expanding but crisis prone capitalist state American Green demonstrates how the fundamental function of these parks was economic and political in the service of maintaining a consensus regarding national identity The organization and control of natural space Germic argues is inseparable from its function as a capitalist instrument This instrumentalism served not only to define constitute and segregate social groups but also to promote racial and ethnic identifications above those based on class interest Providing a fresh insight into United States labor cultural and environmental history this book is an important contribution to our understanding of American parks and the complex meaning of American public space Romanticism and the Rural Community S. White,2013-08-08 The proper organisation of rural communities was central to political and social debates at the turn of the eighteenth century and featured strongly in the 1790s political polemic that influenced so many Romantic poets and novelists This book investigates the representation of the rural village and country town in a range of Romantic texts Drivers of Environmental Change in Uplands Aletta Bonn,Tim Allott,Klaus Hubacek,Jon Stewart,2009-01-13 The uplands are a crucial source of ecosystem services such as water provision carbon retention maintenance of biodiversity provision of recreation value and cultural heritage This puts them in the focus of both environmental and social scientists as well as practitioners and land managers This volume brings together a wealth of knowledge of the British uplands from diverse but interrelated fields of study clearly demonstrating their importance in 21st Century Britain and indicating how we may through interdisciplinary approaches meet the challenges provided by past and future drivers of environmental change The upland environments are subject to change They face imminent threats as well as opportunities from pressures such as climate change changes in land management and related changes in fire risk increases in erosion and water colour degradation of habitats altered wildlife and recreational value as well as significant changes in the economy of these marginal areas This book presents up to date scientific background information addresses policy related issues and lays out pressing land management questions A number of world class experts provide a review of cutting edge natural and social science and an assessment of past current and potential future management strategies policies and other drivers of change After appraisal of key concepts and principles chapters provide specific examples and applications by focussing on UK upland areas and specifically the Peak District National Park as a key example for other highly valuable upland regions *The People's Own Landscape* Scott Moranda,2014-01-21 An exploration of East German tourist practices of the 1970s and 1980s provides new insight into the country s environmental politics **Thomas Hardy's Pastoral** Indy Clark,2016-04-29 This book reads Hardy s poetry of the rural as deeply rooted in the historical tradition of the pastoral mode even as it complicates and extends it It shows that in addition to reinstating the original tensions of classical pastoral Hardy dramatizes a heightened awareness of complex communities and the relations of class labour and gender
