State Formation in Early Modern England, C.1550-1700 Michael J. Braddick, 2000-12-07 This book examines the development of the English state during the long seventeenth century emphasising the impersonal forces which shape the uses of political power rather than the purposeful actions of individuals or groups It is a study of state formation rather than of state building The author's approach does not however rule out the possibility of discerning patterns in the development of the state and a coherent account emerges which offers some alternative answers to relatively well established questions In particular it is argued that the development of the state in this period was shaped in important ways by social interests particularly those of class gender and age It is also argued that this period saw significant changes in the form and functioning of the state which were in some sense modernising The book therefore offers a narrative of the development of the state in the aftermath of revisionism

The Hidden History of Crime, Corruption, and States Renate Bridenthal, 2017-06 Renowned historical sociologist Charles Tilly wrote many years ago that banditry piracy gangland

rivalry policing and war making all belong on the same continuum This volume pursues the idea by revealing how lawbreakers and lawmakers have related to one another on the shadowy terrains of power over wide stretches of time and space Illicit activities and forces have been more important in state building and state maintenance than conventional histories have acknowledged Covering vast chronological and global terrain this book traces the contested and often overlapping boundaries between these practices in such very different polities as the pre modern city states of Europe the modern nation states of France and Japan the imperial power of Britain in India and North America Africa s and Southeast Asia s postcolonial states and the emerging postmodern regional entity of the Mediterranean Sea Indeed the contemporary explosion of transnational crime raises the question of whether or not the relationship of illicit to licit practices may be mutating once more leading to new political forms beyond the nation state
