creativity and recovery The authors arrive at and present their own definitions of these concepts using autoethnography to bring their own experiences into the text They then illustrate to the reader what creativity in recovery looks like in practice through interviews with and written accounts from creative individuals who have experienced a mental health recovery journey grounding the theory with tangible stories of application The interviews are analysed with themes picked out and a model of creativity and recovery produced by the authors Implications and possible future directions are then discussed This unique presentation of creative recovery will be of interest to a wide range of mental health professionals specifically those studying or practising mental health recovery and creative therapies
