Joseph Sirgy, 2011-11-25 The aim of the Handbook of Social Indicators and Quality of Life Research is to create an overview of the field of Quality of Life QOL studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds Social indicators are statistical time series used to monitor the social system helping to identify changes and to guide intervention to alter the course of social change Examples include unemployment rates crime rates estimates of life expectancy health status indices school enrollment rates average achievement scores election voting rates and measures of subjective well being such as satisfaction with life as a whole and with specific domains or aspects of life This book provides a review of the historical development of the field including the history of QOL in medicine and mental health as well as the research related to quality of work life QWL programs It discusses several of QOL main concepts happiness positive psychology and subjective wellbeing Relations between spirituality and religiousness and QOL are examined as are the effects of educational attainment on QOL and marketing and the associations with economic growth The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations

Handbook of Longitudinal Research Scott Menard, 2007-10-11 Longitudinal research is a broad field in which substantial advances have been made over the past decade Unlike many of the existing books that only address the analysis of information The Handbook of Longitudinal Research covers design and measurement as well as the data analysis Designed for use by a wide ranging audience this Handbook not only includes perspective on the methodological and data analysis problems in longitudinal research but it also includes contributors data sets that enable readers who lack sophisticated statistics skills to move from theories about longitudinal data into practice As the comprehensive reference this Handbook has no direct competition as most books in this subject area are more narrowly specialized and are pitched at a high mathematical level Contributors and subject areas are interdisciplinary to reach the broadest possible audience i e psychology epidemiology and economics research fields Summary material will be included for less sophisticated readers Extensive coverage is provided of traditional advanced topics
