Law and Ethnic Plurality Prakash Shah,2007-10-30 The large scale establishment of ethnic minorities and diasporic communities in Europe has gained the attention of social science scholars for a number of decades now However legal interest in this field has remained relatively underdeveloped and few scholars have addressed emerging legal issues to any significant degree This collection of contributions by leading writers in the field of ethnic migration and diaspora studies therefore provides some important interdisciplinary perspectives of how ethnic diasporic minorities in British and European contexts interact with the official legal system This volume makes a significant contribution in assessing the role of law in current debates on the integration of ethnic and religious minorities of migrant origin in the EU

The chapters derive from papers first delivered at a lecture series on Cultural Diversity and Law at the Institute of Advanced Legal Studies. The contributors' disciplinary interests range across law, anthropology, sociology, geography, and political theory, and each one addresses the issues within his or her field of study by adopting approaches that place law within its wider social and political context. The topics covered range from a number of public and private law issues as well as the more conceptual realms of jurisprudence. They include marriage laws, approaches to dispute resolution, the role of courts and juries in the criminal justice system, drugs policies, and the criminalisation of minorities, free speech and blasphemy, planning laws, and the construction of religious buildings, composition of the judiciary, the normative foundations of cultural diversity in law, and integration and law. The compilation should therefore attract an interest beyond its core readership in law, making legal issues accessible to a whole range of students and policy makers within the social sciences.

Misuse of Drugs Leonard Jason-Lloyd, 2007-02-01. A guide to the complex world of prescribed drugs that explains the key provisions and how they interact. It also explains the key terminology and is suitable for police, courts, prosecutors, defence advocates, drugs and crime prevention workers, and students, researchers, and others.

Drugs, Victims and Race Anita Kalunta-Crumpton, 2006-03-01. A book that offers a fresh perspective on discourse around the drug problem in which Anita Kalunta-Crumpton explores common but frequently misleading themes concerning an aspect of criminal justice that know no racial, ethnic, gender, class, age, geographical, or other barriers. She also provides an outline of UK drugs strategy from its class-oriented beginnings in the nineteenth century through later expansion and preoccupation with explanations based around race up until the present day, causing her to ask: Who are the real victims of drugs, drug trafficking, and drug supply? The book examines the drug problem in the context of UK strategies and as a global phenomenon. Set against the backdrop of race and the politics of drug control, it looks at a range of events and issues from the supply end of the drugs chain through enforcement and court proceedings to treatment approaches for addicts and other drug users. Anita Kalunta-Crumpton also goes beyond myths, stereotypes, and assumptions to look at the real-life issues and social characteristics that affect the trafficking, supply, and use of drugs.

Cracked James Davies, 2013-05-09 Why is psychiatry such big business Why are so many psychiatric drugs prescribed 47 million antidepressant prescriptions in the UK alone last year and why without solid scientific justification has the number of mental disorders risen from 106 in 1952 to 374 today The everyday sufferings and setbacks of life are now medicalised into illnesses that require treatment usually with highly profitable drugs Psychological therapist James Davies uses his insider knowledge to illustrate for a general readership how psychiatry has put riches and medical status above patients well being The charge sheet is damning negative drug trials routinely buried antidepressants that work no better than placebos research regularly manipulated to produce positive results doctors seduced by huge pharmaceutical rewards creating more disorders and prescribing more pills and ethical scientific and treatment flaws unscrupulously
