The Mind's Eye Peter Jackson-Main, 2024-10-29 A guide to the relationship between the human iris and psychological characteristics Written by renowned and established iridologist Peter Jackson Main this expertly conceived book provides a ground breaking methodological model of how the iris might be used to understand the energetic psychological and emotional attributes of a person The analysis presented in *The Mind's Eye* places energy as the central aspect of an individual's reality It argues that the physical body is an extension of such energy in the physical realm a map of one's intentions manifesting as a physical being Jackson Main situates the irises as this map which when studied will allow true depth understanding of the human body The book begins with a brief examination of the epistemological foundations of accepted theory and practice in medicine and healing It continues as a journey exploring the development of iris analysis throughout the twentieth century including information on the possibility of heritable personality traits seen in the iris Jackson Main then provides his own perspectives on iris analysis in a manner which is accessible for both practitioners and any lay person looking to learn more about themselves The book also contains a comprehensive guide to completing an energetic iris chart and suggested exercises of practice Not only is *The Mind's Eye* an indispensable guide for any health practitioners wishing to incorporate behavioural iridology into their work but it is also an invitation for all humans to embark on a deeply symbolic journey of self discovery initiated through the marvels of the eye
