Linguistics Jérémie Bouchard, 2021-11-23 This book suggests that applied linguistics research is inherently concerned with complexity emergence and causality and because of this it also requires a robust social ontology The book identifies and unpacks a range of conceptual issues in applied linguistics from a social realist perspective and provides a critique of successionism and interpretivism as two dominant and enduring empiricist tendencies in the field From this critique it considers the emergence of complex dynamic system theory as viable yet not entirely unproblematic conceptual sophistication of current applied linguistics research Although the growing popularity of complex dynamic system theory is

central to any fully rounded analysis of language and language related issues in the world today and their collaboration in this volume represents an initial attempt to redress what they perceive to be an imbalance in the field The book begins with a discussion of neoliberalism and an analysis of the ways in which neoliberal ideology impacts on language This is followed by a discussion of how globalization and identity have been conceptualised in applied linguistics in ways which have ignored the political centrality of class a concept which the authors see as integral to their perspective The book concludes with an analysis of the ways in which neoliberal ideology plays out in two key areas of applied linguistics language teaching and language teacher education Neoliberalism and Applied Linguistics is essential reading for advanced undergraduates postgraduates and researchers in applied linguistics
