Bounded Wilderness Kathryn Jasper,2024-10-15 In *Bounded Wilderness* Kathryn Jasper focuses on the innovations undertaken at the hermitage of Fonte Avellana in central Italy during the eleventh century by its prior Peter Damian d 1072 The congregation of Fonte Avellana experimented with reforming practices that led to new ways of managing property and relations among clergy nobles and the laity Jasper charts how Damian s notion of monastic reform took advantage of the surrounding topography and geography to amplify the sensory aspects of ascetic experiences By focusing on monastic landscapes and land ownership Jasper demonstrates that reform extended beyond abstract ideas Rather reform circulated locally through monastic networks and addressed practical concerns such as property boundaries and rights over water orchards pastures and mills Putting new sources both documentary and archaeological into conversation with monastic charters and Damian s letters *Bounded Wilderness* reveals the interrelationship of economic practices religious traditions and the natural environment in the idea and implementation of reform

Managing Knowledge Networks J. David Johnson,2009-10 The information context of the modern organization is rapidly evolving in the face of intense global competition Information technologies including databases new telecommunications systems and software for synthesizing information make a vast array of information available to an ever expanding number of organizational members Management s exclusive control over knowledge is steadily declining in part because of the downsizing of organizations and the decline of the number of layers in an organizational hierarchy These trends as well as issues surrounding the Web 2 0 and social networking mean that it is increasingly important that we understand how informal knowledge networks impact the generation capturing storing dissemination and application of knowledge This innovative book provides a thorough analysis of knowledge networks focusing on how relationships contribute to the creation of knowledge its distribution within organizations how it is diffused

and transferred and how people find it and share it collaboratively *Pathways Through Adolescence* Lisa J. Crockett, Ann C. Crouter, 2014-03-05 Adolescent researchers are increasingly aware that they must examine development both across time and across context To do so however requires new conceptualizations and methodological approaches to the study of development including attention to the pathways young people choose in adolescence and follow into adulthood This volume assembles work by key researchers in the field who are struggling to understand how developmental trajectories are constructed and maintained throughout the adolescent period A complete understanding of developmental pathways requires the recognition that adolescents social contexts family school neighborhood and or peer group are important influences on the choices they make at this developmental period Researchers have traditionally studied contexts in isolation rather than examining the interrelationships among contexts and their implications for adolescent development The present volume seeks to address this gap in the literature with attention given not only to the interrelationships among contexts for white middle class youth but also to these issues for minority adolescents in neighborhoods that vary in terms of access to resources It concludes with an examination of researcher community collaboration as a strategy to move communities toward a greater awareness of adolescent development and the problems facing youth in their community and as a means to promote potential avenues for policy change and intervention **Social Research Methods** H. Russell Bernard, 2013
