Psychology for Teachers Daniel Wolford la Rue,2015-06-15 Excerpt from Psychology for Teachers We appear to have applied psychology to the teaching of every subject except psychology itself In this direction there is large room for development One of the chief purposes of this book is to present psychology psychologically Usually all the student s work before beginning this subject has been objective To plunge him headlong into subjective phenomena is too much like the method of teaching swimming by throwing the learner overboard From the known to the unknown the old rule holds The method here adopted consists in 1 passing from the familiar picture of man in his common environment to a study with genetic sidelights of Body Brain and Mind 2 showing the relation of adjustment between The Mental and the Environmental and 3 explaining in the study of Mind Nervous System and Behavior how the neuro mental governing and steering system accomplishes its complex task of adjustment In this way we complete the sensori motor circle inward from body to mind outward from mind to behavior The frequently found plan of isolating the discussion of the nervous system in a separate chapter has not been followed Such knowledge is better assimilated and applied if presented in direct connection with the most closely related mental facts About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
