Abstract

Rapid developments in the field of information technology and the trend toward global trade relations imposed the use of new tools to address the government accounting system applied in Iraq to improve the quality of financial information. Reduce manipulation of public money and rationalize the state's economic policies. Adopting these standards contributes to strengthening the accounting profession at the global level and provides financial disclosure that is easy to understand, treat and deal with, and hold government officials accountable its basis. The General Accounting System (IPSAS) in the government accounting system in the field investigated through a survey of the opinions of specialists at the University of Al-Muthanna as a field for conducting research, as well as an indication of the adequacy of laws, legislation and principles that regulate government accounting to ensure good practice of (IPSAS) standards. To achieve the research objectives, a questionnaire was designed Distributed to an intentional sample of accountants, whose number reached (60) accountants. And the research reached several results, the most important of which is that (IPSAS) standards are important in presenting financial reports to help accountants obtain them quickly and thus achieve the efficiency and effectiveness of accounting work and consequently correct and strengthen decisions and ensure their effectiveness, as well as On the possibility of applying international accounting standards in the public sector to its accounting systems.

Keywords: IPSAS standards; government accounting system; Al-Muthanna University.

book refines the features of a variety of different common law and civil law systems down to a recognizable standard CIT system identifying in the process the system's core strengths and problems as well as the factors that determine its impact on corporate behavior. The author offers insightful perspectives on such crucial issues as the following: corporate group members versus corporate groups as taxable entities; anti-abuse rules and developments in judicial anti-abuse doctrines; costs associated with e.g. valuation of assets; compliance and administration; how certain core CIT concepts are independent of tax law efficiency; equity and the protection of existing property rights; the firm's reaction to behavioral control instruments; limitations on the use of losses; depreciation and amortization rules; manipulation of legal characterization and transfer of assets and income. The work has an interdisciplinary approach drawing on the literatures of tax law, economics, corporate law, accounting and business management. It concludes with a set of policy guidelines that should be considered when approaching the traditionally cumbersome interaction between tax systems and corporate groups. Especially valuable to the practitioner are the book's extensive graphic design solutions illustrating the subtleties of the operation of corporate tax laws. Analyzing the taxation of corporate groups in a user-friendly form not available in any other source, this book greatly enhances the development of advanced tax planning methods that do not disrupt the economic operation of businesses. Its comprehensive conceptual framework will greatly facilitate the work of those from practitioners to researchers interested in developing a practical approach to corporate income taxation applicable at a global level.
