Assessment of Communication Disorders in Adults: Resources and Protocols, Third Edition, offers a unique combination of scholarly information, invaluable resources, and time-saving protocols on assessment of communication disorders in adults. This bestselling and trusted text covers the full range of communication disorders in adults, from aphasia to voice disorders. It gives a comprehensive outline of basic assessment procedures, provides a set of protocols that are necessary to assess any communication disorder in adults, addresses the multicultural issues in assessing communication disorders in adults, and offers an integrated assessment approach that includes the most desirable features of the traditional and several alternative approaches. It contains two chapters for each disorder: one on resources that offers scholarly and research background on the disorder, and one on resources that describes practical procedures and protocols that save preparation time and effort for the clinician. New to the Third Edition: Expanded emphasis and specific guidelines on making a correct differential diagnosis; Latest research on the characteristics of communication disorders in adults; Review of recent trends on diagnostic assessment with critical recommendations for students and clinicians; Updated epidemiological research on communication disorders; Revised text to offer more succinct information on assessment tools and diagnostic criteria; The latest standardized and informal assessment instruments; Student-friendly step-by-step instructions on how to conduct initial interviews and share final assessment results with patients in each protocol chapter.
