Superconducting Machines and Devices S. Foner,2013-06-29 This book presents detailed discussions of several of the large scale applications of superconductivity which will have major economic impact on technical developments in the industrial world The world wide concern with energy problems makes this work particularly timely Some of the large scale devices and systems such as superconducting generators motors power transmission large magnets high speed ground transportation and industrial processing clearly speak directly to improved efficiencies of generation and utilization of energy The articles treat each subject in depth The text is suitable for advanced undergraduate or graduate engineering or applied science courses The text should also be of immediate use to practicing engineers and scientists in applied superconductivity The unique summaries of national efforts in applied superconductivity will also be valuable to industrial and government planners The book is based on a NATO Advanced Study Institute entitled Large Scale Applications of Superconductivity and Magnetism which was held September 5 to 14 in the Hotel des Alpes Entreves Valle d Aosta Northern Italy This Study Institute represented a departure from other NATO Advanced Study Institutes in that it was very strongly directed toward engineering applications rather than purely scientifically oriented interests The planning of this Institute developed over several years and would not have been possible without continued interest by several key NATO Scientific Affairs Division scientists It started when one of us S F met with Dr H **Advances in Cryogenic Engineering** K. Timmerhaus,2013-11-09 The University of Colorado and the National Bureau of Standards have once again served as hosts for the Cryogenic Engineering Conference in Boulder Colorado In presenting the papers of this twelfth annual meeting the 1966 Cryogenic Engineering Conference Committee has again recognized the excellent cooperation which has existed between these two organizations over the past decade with regard to both cryogenic research and conference activity This

cooperation was demonstrated not only at the 1966 Cryogenic Engineering Conference but also at the International Institute of Refrigeration Commission I Meeting which was also hosted by these two organizations immediately following the Cryogenic Engineering Conference These two meetings have provided attendees with one of the most comprehensive coverages of cryogenic topics that has ever been presented at one location Emphasis on major international advances in helium technology at the International Institute of Refrigeration Commission I Meeting has been possible largely through the National Science Foundation Grant GK 1116 to the University of Colorado The Cryogenic Engineering Conference Committee gratefully acknowledges this support because of its valuable international contribution to the Cryogenic Engineering Conference As in the past the Cryogenic Engineering Conference Committee is grateful for the continued assistance of all the dedicated workers in the cryogenic field who have contributed their time reviewing the preliminary papers for the program and the final manuscripts for this volume
