Modular Science for AQA Keith Hirst,2005-07 This series is designed to help students prepare effectively for their AQA Modular science exams The Year 10 and Year 11 textbooks are available in both higher and foundation editions for students of a wide range of abilities *From GCSEs to EBCs* Great Britain. Parliament. House of Commons. Education Committee,2013 The Government s plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government s plans The report also questions how well the Government s proposals will serve lower attaining pupils who are often the

most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder opposition to many of the Government's proposals Grading Student Achievement in Higher Education Mantz

Yorke,2007-09-12 A lot hangs on the summative grades that students are given A good degree opens doors which otherwise might remain closed Yet as higher education is now a mass rather than an elite system what is expected of its graduates is different from the expectations of previous generations Students are expected not only to be able to demonstrate high standards of academic achievement but also a variety of capabilities that have at different times been given labels such as generic skills and transferable skills These abilities are difficult to grade for a variety of reasons and some graduates may be losing out because their particular strengths are given insufficient acknowledgement in current summative assessment practices Using the UK honours degree classifications as a case study this book appraises the way in which summative assessment in higher education is approached and shows that the foundations of current practices in the UK and elsewhere are of questionable robustness It argues that there is a need to widen the assessment frame if the breadth of valued student achievements is to be recognised adequately Modular Science for AQA Graham Farrall,Keith Hirst,Delyth

Freeman-Murray,2002 This series is designed to help students prepare effectively for their AQA Modular science exams The Year 10 and Year 11 textbooks are available in both higher and foundation editions for students of a wide range of abilities
