Vladimir A. Polyanskiy, Alexander K. Belyaev, 2022-04-22 This book presents a collection of papers prepared by the researches
of the Institute for Problems in Mechanical Engineering of the Russian Academy of Sciences IPME RAS on the occasion of the
30th anniversary of the establishment of the Institute The IPME RAS is one of the leading research institutes of the Russian
Academy of Sciences and consists of 18 research units laboratories The chapters cover the main research directions of the
institute including nano micro meso and macro mechanics and materials with special emphasis on the problems of strength
of materials and service life of structures **Why Public Higher Education Should Be Free** Robert Samuels, 2013-08-15
Universities tend to be judged by the test scores of their incoming students and not on what students actually learn once they
attend these institutions While shared tests and surveys have been developed most schools refuse to publish the results
Instead they allow such publications as U S News World Report to define educational quality In order to raise their status in
these rankings institutions pour money into new facilities and extracurricular activities while underfunding their educational
programs In Why Public Higher Education Should Be Free Robert Samuels argues that many institutions of higher education
squander funds and mislead the public about such things as average class size faculty to student ratios number of faculty
with PhDs and other indicators of educational quality Parents and students seem to have little knowledge of how colleges and
universities have been restructured over the past thirty years Samuels shows how research universities have begun to
function as giant investment banks or hedge funds that spend money on athletics and administration while increasing tuition
costs and actually lowering the quality of undergraduate education In order to fight higher costs and lower quality Samuels
suggests universities must reallocate these misused funds and concentrate on their core mission of instruction and related
research Throughout the book Samuels argues that the future of our economy and democracy rests on our ability to train
students to be thoughtful participants in the production and analysis of knowledge If leading universities serve only to grant
credentials and prestige our society will suffer irrevocable harm Presenting the problem of how universities make and spend
money Samuels provides solutions to make these important institutions less expensive and more vital By using current
resources in a more effective manner we could even he contends make all public higher education free **Trübner's**
