Harff, G. Bailey, F. Lüth, 2016-01-05 Sea level change has influenced human population globally since prehistoric times Even in early phases of cultural development

human populations were faced with marine regression and transgression as a result of changing climate and corresponding glacio isostatic adjustment Global marine regression during the last glaciation changed the palaeogeography of the continental shelf converting former marine environments to attractive terrestrial habitats for prehistoric humans These areas of the shelf were used as hunting and gathering areas as migration routes between continents and most probably witnessed the earliest developments in seafaring and marine exploitation until the postglacial transgression re submerged these palaeo landscapes Based on modern marine research technologies and the integration of large databases proxy data are increasingly available for the reconstruction of Quaternary submerged landscapes Also prehistoric archaeological remains from the recent sea bottom are shedding new light on human prehistoric development driven by rapidly changing climate and environment This publication contributes to the exchange of ideas and new results in this young and challenging field of underwater palaeoenvironmental investigation

Ulster Journal of Archaeology ,1896 **The Bounty from the Beach** Sylvie Largeaud-Ortega,2018-10-31 The Bounty from the Beach is a collection of cross disciplinary essays capitalising on a widely shared fascination for the Bounty story in order to draw scholarly attention to Oceania It aims to reorient the Bounty focus away from the West where most Bountynarratives and studies have emerged to the Pacific where most of the original events unfolded It investigates the Bounty heritage from the standpoint of the beach Greg Denning s metaphor for culture contact and conflict in the Pacific Islands this liminal place that transforms Islanders and voyagers islands and ships each time it is crossed It analyses the way newcomers create new islands and how these changes may occasionally impact the world This volume examines the little people to use another of Denning s expressions who stand on both sides of the beach they are Polynesian or European or as beaches are crossed and remade no longer one without the other but bound together in processes of change Among these people are Bounty sailors beachcombers Pitcairners and indigenous Pacific Islanders of the past and the present This collection also explores the works of some renowned Western writers and actors who turning mutineers after their own fashion and in their own times themselves crossed the beach and attempted to illuminate the little people involved in the Bounty narratives These prominent writers and actors put the spotlight on characters who were silenced on account of race class or geographical distance from the dominant centres of power Inspired by Denning s empowering voice our purpose is to fill that silence Just as it criss crosses the ocean progressing with the ship through time and space TheBounty from the Beach ranges far and wide across disciplines methodologies and scholarly styles Its multidisciplinary course contributes to illuminate the multiple ways in which the Bounty heritage embraces diverse horizons It throws light on the colonial discourse

that undertook to stifle Pacific Islander agency and the neocolonial policies that have been applied to Oceania and still are hegemonic moves that have led to global environmental nuclear and ecological hazards As a whole the collection contends that what unfolds in this vast ocean matters the stakes are high for the whole human community Archaeology of the War of 1812 Michael T. Lucas, Julie M. Schablitsky, 2016-06-16 This is the first summary of archaeological contributions to our understanding of the War of 1812 by examining recent excavations and field surveys on fortifications encampments landscapes shipwrecks and battles in the different regions of the United States and Canada **Pākehā Settlements in a Māori World** Ian Smith, 2020-01-28 Pākehā Settlements in a Māori World offers a vivid account of early European experience in these islands through material evidence offered by the archaeological record As European exploration in the 1770s gave way to sealing whaling and timber felling Pākehā visitors first became sojourners in small remote camps then settlers scattered around the coast Over time mission stations were established alongside farms businesses and industries and eventually towns and government centres Through these decades a small but growing Pākehā population lived within and alongside a Māori world often interacting closely This phase drew to a close in the 1850s as the numbers of Pākehā began to exceed the Māori population and the wars of the 1860s brought brutal transformation to the emerging society and its economy Archaeologist Ian Smith tells the story of adaptation change and continuity as two vastly different cultures learned to inhabit the same country From the scant physical signs of first contact to the wealth of detail about daily life in established settlements archaeological evidence amplifies the historical narrative Glimpses of a world in the midst of turbulent change abound in this richly illustrated book As the visual narrative makes clear archaeology brings history into the present making the past visible in the landscape around us and enabling an understanding of complex histories in the places we inhabit

Archaeology of Pacific Oceania Mike T. Carson, 2023-10-11 Archaeology of Pacific Oceania now in its second edition offers a state of the art and fully detailed chronological narrative of how Pacific Oceania came to be inhabited over a long time scale posing fundamental questions both for Pacific Oceania and for global archaeology The Pacific Ocean covers 165 million sq km nearly one third of the world's total surface area yet its thousands of islands and their diverse cultural histories are scarcely known to the other two thirds of the world This book asks how and why did this vast sea of islands come to be inhabited over the last several millennia transcending significant change in ecology demography and society What were the roles of overseas contacts in the development of social networks economic trade and population dynamics What can any or all of the thousands of islands offer as ideal model systems for comprehending globally significant issues of human environment relations and coping with changing circumstances of natural and cultural history What do the island archaeology records reveal about coastal setting as part of the larger human experience How does Pacific Oceanic archaeology relate with a larger Asia Pacific context or with the scope of world archaeology The new second edition of Archaeology of Pacific Oceania addresses these questions and more providing an updated synthesis of this important region

Archaeology of Pacific Oceania is for scholars of Asia Pacific archaeology and anthropology and will support students investigating the archaeology of Pacific Oceania **The Oxford Handbook of Caribbean Archaeology** William F. Keegan, Corinne L. Hofman, Reniel Rodriguez Ramos, 2013-02-07 The Oxford Handbook of Caribbean Archaeology provides an overview of archaeological investigations in the insular Caribbean understood here as the islands whose shores surround the Caribbean Sea and the islands of the Bahama Archipelago Though these islands were never isolated from the surrounding mainland their histories are sufficiently diverse to warrant their identification as distinct areas of culture Over the past 20 years Caribbean archaeology has been transformed from a focus on reconstructing culture histories to one on the mobility and exchange expressed in cultural and social dynamics This Handbook brings together for the first time examples of the best research conducted by scholars from across the globe to address the complexity of the Caribbean past The Handbook is divided into five sections Part I Islands of History and the Precolonial History of the Caribbean Islands provides an introduction to Caribbean Archaeology and its history The papers in the following Ethnohistory section address the diversity of cultural practices expressed in the insular Caribbean and develop historical descriptions in concert with archaeological evidence in order to place language social organization and the native Ta nos and Island Caribs in perspective The following section Culture History provides the latest research on specific geographical locations and cross cultural engagements from Jamaica and the Bahama archipelago to the Saladoid and the Isthmo Antillean Engagements Creating History the fourth section includes papers on specific issues related to the field such as Zooarchaeology Rock Art and DNA analysis among others The final section World History centers on the consequences of European colonization
