Wilson, 1978-01-01 Analysis of the Atigun site based on work conducted in 1973 and 1974 on the North Slope of the Central Brooks Range Alaska The Atigun site is marginal to both Native and Inuit territory thus the primary concern of this analysis is the cultural affiliation of its occupants Conclusions point to late summer occupation of the site by Athapaskans between A D 1400 and A D 1800 This period is defined as the Kavik phase Published in English      *Archaeological Survey of Canada Annual Review 1980-1981 / Commission archéologique du Canada, rapports annuels 1980-1981* Robert McGhee, 1983-01-01 This volume describes the activities of the Archaeological Survey of Canada National Museum of Man for the years 1980 and 1981 Bilingual Edition      Taphonomy and Archaeology in the Upper Pleistocene of the Northern Yukon Territory Richard E. Morlan, 1980-01-01 The concept of taphonomy has been borrowed from paleontology and applied to the analysis of vertebrate fossils from the Old Crow region of the northern Yukon Territory By means of this approach archaeologically significant specimens have been isolated from the larger suite of materials which can be explained entirely in terms of natural processes The analysis indicates that human occupation began in eastern Beringia more than 50 000 years ago and probably was continuous from that time onward but primary archaeological deposits will be needed to clarify the historical and paleo environmental significance of these finds Published in English
