Archaeology And The Manmade Material Reality:

Archaeology and the Man-made Material Reality Klavs Randsborg, 1992 A personal account of the current state of archaeological studies by the Research Professor at the Archaeological Institute of Copenhagen University The structure is thematic chapters for example on The place and its context Interpretations and society Archaeology and history and it does not attempt to present any single archaeological tradition with examples taken from Europe the Mediterranean and the Near East More than just an introduction to the subject for students it concentrates on the important issues of the unity of archaeology and its great potential for the future Current Swedish Archaeology, 2001 **Paradigm Found** Kristian Kristiansen, Ladislav Šmejda, Jan Turek, 2015-01-21 Paradigm Found brings together papers by renowned researchers from across Europe Asia and America to discuss a selection of pressing issues in current archaeological theory and method The book also reviews the effects and potential of various theoretical stances in the context of prehistoric archaeology The 23 papers provide a discussion of the issues currently re appearing in the focal point of theoretical debates in archaeology such as the role of the discipline in the present day society problems of interpretation in archaeology approaches to the study of social evolution as well as current insights into issues in classification and construction of typologies Taking a fresh and often provocative look at the challenges contemporary archaeology is facing the contributors evaluate the effects of past developments and discuss the impact they are likely to have on future directions in archaeology as an internationally connected discipline In its final part the volume reflects on current thinking on prehistory using case studies from a number of European regions and the Mediterranean from the Neolithic to the Roman Period The volume represents a tribute to the lifetime achievements of Professor Ev en Neustupn a distinguished Czech archaeologist who contributed to the advancement of prehistoric studies in Europe and to archaeological theory and method in particular *Antiquity* Osbert Guy Stanhope Crawford, 1993 Includes section Reviews **Archaeologia Polona**, 1993 *Archaeology of Public Estates* Giovanna Bianchi, 2025-05-15 This study examines public estates in Tuscany s Maremma region from the 9th to 11th centuries identifying material markers of royal properties It explores the role of public lands local aristocracies landscape transformations production exchange and rural economic growth before the 12th century *The Routledge Handbook of Archaeology and Plastics* Genevieve Godin, Þóra Pétursdóttir, Estelle Praet, John Schofield, 2024-09-17 The Routledge Handbook of Archaeology and Plastics investigates the archaeology of the contemporary world through the lens of its most distinguishing and problematic material Plastics are ubiquitous and have been so for nearly three generations since they became widely used in the early 1950s Plastics will persist for millennia their legacies as toxic heritage being felt deep into the future In this book comprising 32 original at times disturbing and critically engaged contributions scholars from archaeology and other cognate disciplines explore plastics from a number of different angles and perspectives Together these contributions highlight the dilemma that plastics present their usefulness on the one hand and the threats they present

to environmental health on the other The volume also explores the lessons that archaeologists can learn from plastics about episodes of mass production consumption and toxicity in the past and also importantly about the future This important and timely collection will therefore be of interest to all archaeologists irrespective of their period of study or their geographical focus and to students of archaeology and cultural heritage It will also be relevant for researchers and students in other fields of study that focus on plastics and their environmental and social impacts Ultimately this book concerns the contemporary world and the impact of people upon it through the archaeological lens *Theoretical Archaeology* Ken R. Medieval Childhood D. M. Hadley, K.A. Hemer, 2014-08-31 The nine papers presented here set out to broaden the recent focus of archaeological evidence for medieval children and childhood and to offer new ways of exploring their lives and experiences The everyday use of space and changes in the layout of buildings are examined in order to reveal how these impacted upon the daily practices and tasks of household tasks relating to the upbringing of children Aspects of work and play are explored how archaeologically we can determine whether and in what context children played board and dice games How we may gain insights into the medieval countryside from the perspective of children and thus begin to understand the processes of reproduction of particular aspects of medieval society and the spaces where children's activities occurred and the possible role of children in the medieval pottery industry Funerary aspects are considered the burial of infants in early English Christian cemeteries the treatment and disposal of infants and children in the cremation ritual of early Anglo Saxon England and childhood children and mobility in early medieval western Britain especially Wales The volume concludes with an exploration of what archaeologists can draw from other disciplines historians art historians folklorists and literary scholars and the approaches that they take to the study of childhood and thus the enhancement of our knowledge of medieval society in general
