Romanland Anthony Kaldellis,2019-04-01 A leading historian argues that in the empire we know as Byzantium the Greek speaking population was actually Roman and scholars have deliberately mislabeled their ethnicity for the past two centuries for political reasons Was there ever such a thing as Byzantium Certainly no emperor ever called himself Byzantine And while the

identities of minorities in the eastern empire are clear contemporaries speak of Slavs Bulgarians Armenians Jews and Muslims that of the ruling majority remains obscured behind a name made up by later generations Historical evidence tells us unequivocally that Byzantium's ethnic majority no less than the ruler of Constantinople would have identified as Roman It was an identity so strong in the eastern empire that even the conquering Ottomans would eventually adopt it But Western scholarship has a long tradition of denying the Romanness of Byzantium In Romanland Anthony Kaldellis investigates why and argues that it is time for the Romanness of these so called Byzantines to be taken seriously In the Middle Ages he explains people of the eastern empire were labeled Greeks and by the nineteenth century they were shorn of their distorted Greekness and became Byzantine Only when we understand that the Greek speaking population of Byzantium was actually Roman will we fully appreciate the nature of Roman ethnic identity We will also better understand the processes of assimilation that led to the absorption of foreign and minority groups into the dominant ethnic group the Romans who presided over the vast multiethnic empire of the east **Armenia and the Armenians** Hagopos Isaverdentz,1874
