Arms Limitation And Disarmament Restraints On War 1899 1939:

Arms Limitation and Disarmament B.J.C. Mckercher, 1992-10-26 This collection examines various aspects of the efforts made to limit warfare through arms limitation and disarmament agreements in the period from the first Hague conference to the outbreak of World War II in Europe The issue for each contributor is not necessarily to show whether individual endeavors separate conferences and the rest were successful or unsuccessful though this is an important consideration Rather each chapter tends to offer differing points of view on accomplishments and failures because as is so often the experience in historical study the record is mixed and this situation is certainly no less characteristic of arms limitation and disarmament between 1899 and 1939 Written by experts on disarmament issues these chapters put into historical perspective how and why the effort to restrain war were undertaken at the Hague conferences the Washington conference and among antiwar groups Each contributor approaches this task using the method he or she deems most appropriate Some employ an historiographical approach others undertake to produce analyses based heavily on archival holdings in order to offer new interpretations of the past or revise existing ones This book will be of interest to students and teachers alike of modern history and political science **The Royal Navy and the German Threat 1901-1914** Matthew S.

Seligmann, 2012-05-24 When and why did the Royal Navy come to view the expansion of German maritime power as a threat to British maritime security Contrary to current thinking Matthew S Seligmann argues that Germany emerged as a major threat at the outset of the twentieth century not because of its growing battle fleet but because the British Admiralty rightly believed that Germany's naval planners intended to arm their country's fast merchant vessels in wartime and send them out to attack British trade in the manner of the privateers of old This threat to British seaborne commerce was so serious that the leadership of the Royal Navy spent twelve years trying to work out how best to counter it Ever more elaborate measures were devised to this end These included building fighting liners to run down the German ones devising a specialized warship the battle cruiser as a weapon of trade defence attempting to change international law to prohibit the conversion of merchant vessels into warships on the high seas establishing a global intelligence network to monitor German shipping movements and finally the arming of British merchant vessels in self defence The manner in which German schemes for commerce warfare drove British naval policy for over a decade before 1914 has not been recognized before The Royal Navy and the German Threat illustrates a new and important aspect of British naval history **The Law of Nations and Britain's Quest for**

Naval Security Scott Andrew Keefer, 2016-11-13 As the centenary of the Treaty of Versailles approaches this book presents the pre 1914 precursors to the interwar naval arms treaties arising from the peace of 1919 providing a fresh perspective on arms control efforts through an interdisciplinary approach Interweaving historical investigation with legal analysis Scott Keefer traces the British role in the development of naval arms control outlining the pragmatic Foreign Office approaches towards international law By emphasizing what was possible within the existing legal system rather than attempting to

create radically powerful international institutions statesmen crafted treaties to exploit the unique pace of naval construction Utilizing previously overlooked archival resources this book investigates how the great powers exploited treaties as elements of national security strategies The result is a fuller analysis of the Hague Peace Conferences Anglo German discussions and lesser known regional agreements from the American Great Lakes to South America and a richer exploration of pre 1914 diplomacy providing insights into how a past generation perceived questions of war and defence **The Foreign Office**

Mind T. G. Otte,2013-08-22 With this pioneering approach to the study of international history T G Otte reconstructs the underlying principles lite perceptions and unspoken assumptions that shaped British foreign policy between the death of Palmerston and the outbreak of the First World War Grounded in a wide range of public and private archival sources and drawing on sociological insights The Foreign Office Mind presents a comprehensive analysis of the foreign service as a knowledge based organization rooted in the social and educational background of the diplomatic lite and the broader political social and cultural fabric of Victorian and Edwardian Britain The book charts how the collective mindset of successive generations of professional diplomats evolved and reacted to and shaped changes in international relations during the second half of the nineteenth century including the balance of power and arms races the origins of appeasement and the causes of the First World War Imperialism at Sea Rolf Hobson,2021-10-01 Was Grand Admiral Alfred von Tirpitz plan for naval

expansion and the development of a risk fleet as a way to position Wilhelmine Germany as a world power to rival Britain so unique This comparative study of the modern naval strategy of Germany Britain France and the United States seeks to answer that question First Hobson is the only naval scholar to simultaneously compare the Tirpitz Plan with plans of the other leading nations of that time Second Hobson also interacts with how other scholars have assessed the complex interplay between naval history both in and outside Germany maritime law and naval strategy Hobson offers a unique interpretation of the causes and objectives of the German Imperial Navy at the end of the nineteenth century forces that ultimately led to the First World War **Planning Armageddon** Nicholas A. Lambert,2012-01-01 Before the First World War the British

Admiralty conceived a plan to win rapid victory in the event of war with Germany economic warfare on an unprecedented scale This secret strategy called for the state to exploit Britain s effective monopolies in banking communications and shipping the essential infrastructure underpinning global trade to create a controlled implosion of the world economic system In this revisionist account Nicholas Lambert shows in lively detail how naval planners persuaded the British political leadership that systematic disruption of the global economy could bring about German military paralysis After the outbreak of hostilities the government shied away from full implementation upon realizing the extent of likely collateral damage political social economic and diplomatic to both Britain and neutral countries Woodrow Wilson in particular bristled at British restrictions on trade A new less disruptive approach to economic coercion was hastily improvised The result was the blockade ostensibly intended to starve Germany It proved largely ineffective because of the massive political influence of

economic interests on national ambitions and the continued interdependencies of all countries upon the smooth functioning of the global trading system Lambert's interpretation entirely overturns the conventional understanding of British strategy in the early part of the First World War and underscores the importance in any analysis of strategic policy of understanding Clausewitz's political conditions of war

Naval Warfare 1919-45 Malcolm H. Murfett, 2008-11-04 Naval Warfare 1919 45 is a comprehensive history of the war at sea from the end of the Great War to the end of World War Two Showing the bewildering nature and complexity of the war facing those charged with fighting it around the world this book ranges far and wide sweeping across all naval theatres and those powers performing major as well as minor roles within them Armed with the latest material from an extensive set of sources Malcolm H Murfett has written an absorbing as well as a comprehensive reference work He demonstrates that superior equipment and the best intelligence ominous power and systematic planning vast finance and suitable training are often simply not enough in themselves to guarantee the successful outcome of a particular encounter at sea Sometimes the narrow difference between victory and defeat hinges on those infinite variables the individual's performance under acute pressure and sheer luck Naval Warfare 1919 45 is an analytical and interpretive study which is an accessible and fascinating read both for students and for interested members of the general public

Armaments and the Coming of War David Stevenson, 1996 David Stevenson directs attention away from the Anglo German naval race towards the competition on land between the continental armies He analyses the defence policies of the Powers and the interaction between the growth of military preparedness and the diplomatic crises in the Mediterranean and the Balkans that culminated in the events of July August 1914

Holding Their Breath M. Girard Dorsey, 2023-03-15 *Holding Their Breath* uncovers just how close Britain the United States and Canada came to crossing the red line that restrained chemical weapon use during World War II Unlike in World War I belligerents did not release poison gas regularly during the Second World War Yet the looming threat of chemical warfare significantly affected the actions and attitudes of these three nations as they prepared their populations for war mediated their diplomatic and military alliances and attempted to defend their national identities and sovereignty The story of chemical weapons and World War II begins in the interwar period as politicians and citizens alike advocated to ban to resist and eventually to prepare for gas use in the next war M Girard Dorsey reveals through extensive research in multinational archives and historical literature that although poison gas was rarely released on the battlefield in World War II experts as well as lay people dedicated significant time and energy to the weapon's potential use they did not view chemical warfare as obsolete or taboo Poison gas was an influential weapon in World War II even if not deployed in a traditional way and arms control for various reasons worked Thus what did not happen is just as important as what did *Holding Their Breath* provides insight into these potentialities by untangling World War II diplomacy and chemical weapons use in a new way

The British Way in Warfare: Power and the International System, 1856-1956 Keith Neilson, 2016-03-16 In his groundbreaking book *The British Way in Warfare* Routledge 1990 David French outlined the skillful combination of maritime economic and diplomatic power employed by Britain to achieve its international goals Almost two decades later this collection offers a reassessment of French's thesis using it as a lens through which to explore Britain's relationship with various kinds of power military and civil and how this was employed across the globe In particular each essay addresses the ways in which the use of power manifested itself in the maintenance of Britain's place within the international system between 1856 and 1956 Adopting twin methodologies the collection firstly addresses the broad question of Britain's relationship with other Great Powers and how these influenced the strategies used before then testing these with specific case studies By taking this approach it is possible to discern which policies were successful and which failed and whether these remained constant across time and space Measuring Britain's strategy against her commercial imperial and military competitors including France the USA Italy Germany and Russia allows intriguing conclusions to be drawn about just how an essentially maritime power could compete with much larger and potentially more powerful continental rivals With contributions from an outstanding selection of military scholars this collection addresses fundamental questions about the intersection of military economic and diplomatic history that are as relevant today as they were during the height of Britain's

imperial power It will prove essential reading not only for those with an interest in British military history but for anyone wishing to understand how power in all its multifaceted guises can be employed for national advantage on the international stage *British Naval Strategy East of Suez, 1900-2000* Greg Kennedy, 2004-11-18 Britain's strategic position east of Suez in the twentieth century was a dominant area of interest and had an enormous impact in the overall construction of Great Britain's naval strategic posture *The Royal Navy, Seapower and Strategy between the Wars* C. Bell, 2000-08-02 This revisionist study shows how the Royal Navy's ideas about the meaning and application of seapower shaped its policies during the years between the wars It examines the navy's ongoing struggle with the Treasury for funds the real meaning of the one power standard naval strategies for war with the United States Japan Germany and Italy the influence of Mahan the role of the navy in peacetime and the use of propaganda to influence the British public

Great Britain, International Law, and the Evolution of Maritime Strategic Thought, 1856-1914 Gabriela A. Frei, 2020 Gabriela A Frei examines how sea powers used international law as an instrument in foreign policy in the nineteenth and early twentieth centuries illuminating key developments of international maritime law surrounding state practice custom and codification and outlining the complex relationship between international law and maritime strategy *Britain and the Mine, 1900-1915* Richard Dunley, 2018-05-03 This book examines Britain's complex relationship with the mine in the years 1900-1915 The development of mine warfare represented a unique mix of challenges and opportunities for Britain in the years before the First World War The mine represented the antithesis of British maritime culture in material form and attempts were made to limit its use under international law At the same time mine warfare offered the Royal Navy a solution to its most difficult strategic problem Richard Dunley explores the contested position occupied by the mine in the attitudes of British policy makers and in doing so sheds new light on the overlapping worlds of culture strategy and international law

Global Great Depression and the Coming of World War II John E. Moser, 2015-11-17 The Global Great Depression and the Coming of World War II demonstrates the ways in which the economic crisis of the late 1920s and early 1930s helped to cause and shape the course of the Second World War Historian John E Moser points to the essential uniformity in the way in which the world's industrialized and industrializing nations responded to the challenge of the Depression Among these nations there was a move away from legislative deliberation and toward executive authority away from free trade and toward the creation of regional trading blocs away from the international gold standard and toward managed national currencies away from chaotic individual liberty and toward rational regimentation in other words away from classical liberalism and toward some combination of corporatism nationalism and militarism For all the similarities however there was still a great divide between two different general approaches to the economic crisis Those countries that enjoyed easy unchallenged access to resources and markets the United States Great Britain the Soviet Union and France tended to turn inward erecting tariff walls and promoting domestic recovery at the expense of the international order On the other hand those nations that lacked such

access Germany and Japan sought to take the necessary resources and markets by force The interplay of these powers then constituted the dynamic of international relations of the 1930s have nots attempting to achieve self sufficiency through aggressive means challenging haves that were too distrustful of one another and too preoccupied with their own domestic affairs to work cooperatively in an effort to stop them
