Arms in Academia Elliot Murphy, 2020-07-26 This book studies how the arms trade has continued to receive generous state subsidies along with less direct forms of financial and intellectual support from academia in the UK It examines the ways in which arms dealing has contributed to the violation of human rights in the Middle East North Africa South America Indochina and other regions of intense conflict and in doing so reveals how the industry sells a particular image of itself to the public The volume Extensively covers the arms trade and its impact across the world Shows how the UK arms trade has developed research investment and consultancy links with universities museums and other public institutions Discusses the future of the arms trade and explores alternatives in terms of job opportunities economic growth and academic research criteria A major intervention in international politics this volume will be of great interest to scholars and researchers of military and strategic studies international relations human rights and the social sciences in general It will also be of interest to policy analysts and defence professionals      **Arms Politics** Francesco Buscemi, 2025-08-15 In *Arms Politics* Francesco Buscemi tells the story of the ceasefire disarmament and rearmament of the Ta ang movement in Myanmar's Shan State through an analysis of the formation of the Palaung State Liberation Front Ta ang National Liberation Army PSLF TNLA With a focus on the circulation of weapons through the post 1991 ceasefire disarmament and rearmament years Buscemi explores how becoming and being an armed force leads to the becoming and being of a rebel polity Buscemi argues that the governance of arms and weaponry by rebel movements such as the PSLF TNLA shapes historically and spatially complex relationships among leadership rank and file civilians and civil society groups Furthermore he demonstrates that it is through the acquisition of weapons and the governing of armed collectives that rebel movements reproduce and shape the collective identity of their polity and its political geography Against the backdrop of the world's longest ongoing armed conflict *Arms Politics* shows how the processes and practices of governing weapons shape social and spatial relations of rule at the edges of state authority      The Handbook on the Political Economy of War Christopher J. Coyne, Rachel L. Mathers, 2011-01-01 The *Handbook on the Political Economy of War* highlights and explores important research questions and discusses the core elements of the political economy of war      *The Politics and Economics of Defence Industries* Efraim Inbar, Ben Zion Zilberfarb, 2013-09-13 This volume provides a policy relevant analysis of the complex web of contemporary economic trends political developments and strategic considerations that are shaping the contours of the new post Cold War world market for

**Political Economy and the New Capitalism** Jan Toporowski, 2002-01-31 Political Economy and the New Capitalism examines the relevance of Sam Aaronovitch's pioneering empirical studies of British capitalism in the light of modern developments. A wide range of problems are reviewed from industrial concentration today to the co-ordination of economic policies in Europe. Aaronovitch's work on the role of finance in the British economy is the subject of sustained reflection. Individual chapters examine orthodox and left-wing criticisms of finance exchange rate instability and employment growth and regions in the context of the European Union. This work concludes with a bibliography of the published writings of Sam Aaronovitch and collects the reflections of some of the most distinguished thinkers in economics today including Meghnad Desai G C Harcourt Pat Devine Egon Matzner Malcolm Sawyer Sir Alan Budd Jan Toporowski Philip Arestis Eleni Paliginis Victoria Chick and Ben Fine.

**Race and Liberty in America** Jonathan Bean, 2009-07-17 The history of civil rights in the United States is usually analyzed and interpreted through the lenses of modern conservatism and progressive liberalism. In *Race and Liberty in America: The Essential Reader* author Jonathan Bean argues that the historical record does not conveniently fit into either of these categories and that knowledge of the American classical liberal tradition is required to gain a more accurate understanding of the past present and future of civil liberties in the nation. By assembling and contextualizing classic documents from the Declaration of Independence to the Civil Rights Act of 1964 to the 2007 U.S. Supreme Court decision banning school assignment by race Bean demonstrates that classical liberalism differs from progressive liberalism in emphasizing individual freedom Christianity the racial neutrality of the Constitution complete color blindness and free market capitalism. A comprehensive and vital resource for scholars and students of civil liberties *Race and Liberty in America* presents a wealth of primary sources that trace the evolution of civil rights throughout U.S. history.

The Political Economy of South Africa's Post-apartheid Transition Benjamin Fine, 2025-05-26 South Africa's post-apartheid transition has proven disastrous. It is marked by the emergence of a black elite of enriched capitalists out of the globalisation neoliberalisation and financialisation of the economy in general and of its Minerals Energy and Financial Complex in particular. By contrast inequalities poverty and failing social provision have persisted. Recent attention has shifted to how this disastrous trajectory was initiated some suggesting a lack of available alternative policy options at the time of transition. This is shown to be false with a full range of progressive alternatives being rejected with corresponding

consequences from state capture to electoral defeat

### **The Political Economy of Civil War and UN Peace Operations**

Mats Berdal, Jake Sherman, 2023-03-31 This book examines the operational and political challenges facing UN peace operations deployed in countries where civil war and protracted violence have given rise to the complex and distinctive political economies of conflict. The volume explores the nature and impact of such political economies, informal systems of power and influence formed by the interaction of local, national and region wide war economies with the political agendas of conflict actors on the course of UN peace operations. It focuses in detail on the UN's long running peace operations in the Democratic Republic of Congo, South Sudan, Afghanistan, Sierra Leone, Mali and Somalia. The book is centrally concerned with the interaction of UN missions with the power structures and local conflict dynamics that shape individual mission settings and the challenges these pose for mediation, protection of civilians and other tasks. It also offers a critical assessment of the various ways in which the UN system, from its headquarters in New York to the field, has confronted the policy challenges posed by political economies of conflict affected states, societies and regions. It advances a pragmatic set of policy recommendations aimed at improving the UN's ability to confront predatory and exploitative war economies. At the same time, the volume makes it clear that political and institutional obstacles to more effective UN action are certain to remain profound and are unlikely ever to be fully overcome, let alone eradicated. Despite making some progress since the 1990s to better understand the political economy of civil wars, the UN has struggled with how to tackle informal networks of power and their consequences for efforts to end wars. The book will be of special interest to students of war and conflict studies, statebuilding, political economy of conflict, UN interventionism and peacebuilding and IR Security in general.
