Army Forces for Operations Other Than War ,1997 The research described in this report was directed at the question How does the conduct of operations such as peace enforcement humanitarian assistance peacekeeping and lesser regional contingencies influence the readiness and availability of Army forces to deploy to an MRC We examine OOTW missions performed by the Army since 1975 and plans for possible future operations in order to define force requirements for OOTW The requirements are defined in terms of unit type numbers of units and duration of deployment and are intended to exemplify the forces likely to be required for future OOTW scenarios We then compare the number type and component of Army units needed for simultaneous OOTW and MRCs to those in the planned force structure The analysis does not examine the degree to which the operations might be conducted with a different mix of forces i e active or reserve Army Department of the Army civilians contractors or forces from the other services in the future nor the potential effects of that different mix We also developed a methodology to evaluate the influence of OOTW on the Army s capability to deploy forces to an MRC taking into consideration the time required for units first to prepare and deploy for the OOTW and then to regain combat ready status after their return The methodology also considers the effects of rotation and tour length policies on the availability of forces That methodology is then applied in detail to the case of Somalia as an OOTW that the Army needed to perform while maintaining readiness for an MRC

Department of the Army, 1993 **The US Military Profession into the 21st Century** Sam Sarkesian, Robert Connor, 2006-04-18 This brand new edition of The US Military Profession into the Twenty First Century re examines the challenges faced by the military profession in the aftermath of the international terrorist attack on the United States on September 11 2001 While many of the issues facing the military profession examined in the first edition remain the new war and international terrorism have compounded the challenges The US military must respond to the changed domestic and strategic landscapes without diminishing its primary function a function that now many see that goes beyond success on the battlefield Not only has this complicated the problem of reconciling the military professional ethos and *raison d'etre* with civilian control in a democracy it challenges traditional military professionalism This book also studies the notion of a US military stretched thin and relying more heavily on the US Federal Reserves and National Guard These developments make the US military profession increasingly linked to public attitudes and political perspectives In sum the challenge faced by the US military profession can be termed a dual dilemma It must respond effectively to the twenty first century strategic landscape while undergoing the revolution in military affairs and transformation At the same time the military profession must insure that it remains compatible with civilian cultures and

the US political social system without eroding its primary function This is an invaluable book for all students with an interest in the US Military and of strategic studies and military history in general *INSCOM Journal* ,1992 *Joint Force Quarterly* ,1995 *Department of Defense Authorization for Appropriations for Fiscal Year 1995 and the Future Years Defense Program* United States.
