A Brief History of the Doctrine of the Trinity in the Early Church Franz Dünzl, 2007-10-30 Franz Dünzl gives an account of the formation of the doctrine of the Trinity in a narrative based on contemporary sources as he remarks in the preface he wants to describe the human struggle over the truth of the Christian image of God and as far as possible let the early Christians speak for themselves His main concern is to describe the dynamic of the disputes over the theology of the Trinity in a vivid way which is easy to follow pointing out the foundations of the doctrine and the decisive shifts in its development He tries to see the often bitter discussion not as a barren dispute but as an evolutionary process in which the rivalry is a necessary and positive factor in moving the debate forward After an introduction to the problem the book describes the beginning of christology and the first models of the relationship between Father and Son it then describes the controversies leading up to the Council of Nicaea which are discussed at length going on to show how Nicaea didn't settle the question and continuing the account up to the Council of Constantinople in 381 It brings out the political influences which governed this second stage of the discussion in an illuminating way A survey and bibliography round the book off
