Pamela H. Smith, 2004-06-25 Since the time of Aristotle the making of knowledge and the making of objects have generally been considered separate enterprises Yet during the late sixteenth and early seventeenth centuries the two became linked through a new philosophy known as science In *The Body of the Artisan* Pamela H Smith demonstrates how much early modern science owed to an unlikely source artists and artisans From goldsmiths to locksmiths and from carpenters to painters artists and artisans were much sought after by the new scientists for their intimate hands on knowledge of natural materials and the ability to manipulate them Drawing on a fascinating array of new evidence from northern Europe including artisans objects and their writings Smith shows how artisans saw all knowledge as rooted in matter and nature With nearly two hundred images *The Body of the Artisan* provides astonishingly vivid examples of this Renaissance synergy among art craft and science and recovers a forgotten episode of the Scientific Revolution an episode that forever altered the way we see the natural world **The Dutch Republic in the Seventeenth Century** Maarten Prak, 2023-01-19 Substantially revised

Steven Nadler, 2023-12-14 This full length biography offers a view into seventeenth century Haarlem where Hals lived and worked and this culturally rich era of the Dutch Republic Frans Hals was one of the greatest portrait painters in history and

his style transformed ideas and expectations about what portraiture can do and what a painting should look like Hals was a member of the great trifecta of Dutch Baroque painters alongside Rembrandt and Vermeer and he was the portraitist of choice for entrepreneurs merchants professionals theologians intellectuals militiamen and even his fellow artists in the Dutch Golden Age His works with their visible brush strokes and bold execution lacked the fine detail and smooth finish common among his peers and some dismissed his works as sloppy and unfinished But for others they were fresh and exciting filled with a sense of the sitter's animated presence captured with energy and immediacy This is the first full length biography of Hals in many years It offers a view into seventeenth century Haarlem and this culturally rich era of the Dutch Republic Nadler tells the story not only of Hals's life but also of the artistic social political and religious worlds in which he lived and worked Foreword Marrigje Rikken Head of Collections and Exhibitions Frans Hals Museum *Painters' Playbooks in the Art Market of Early Modern Amsterdam* Weixuan W. Li, 2025-10-24 The art market in seventeenth century Amsterdam is renowned as a competitive multi layered arena where diverse artists catered to a broad and varied clientele How did this intricate market function How did individual painters navigate this system making business and artistic decisions that eventually gave shape to the so called Golden Age of Dutch art Existing economic and art historical methodologies have fallen short of providing holistic explanations *Painters Playbooks* introduces an innovative socio spatial approach using digital methods to examine the art market shedding light on the artistic development in seventeenth century Amsterdam By synthesizing various historical sources digitally this book delves into artists collective behaviours or the playbooks discernible in their location choices social relations and use of house interiors Analysing historical data through a socio spatial lens this book illustrates how the changes in artists playbooks not only shaped the multi layered market structure but also influenced artistic innovation in seventeenth century Amsterdam *The Power of Color* Marcia B. Hall, 2019-01-01 This beautifully illustrated volume explores the history of color across five centuries of European painting unfolding layers of artistic cultural and political meaning through a deep understanding of technique *The Oxford History of Western Art* Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation

but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated. The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis. Another key feature of the narrative is the redefinition of traditional period boundaries. Rather than relying on conventional labels such as Medieval, Renaissance, Baroque etc, five major phases of significant historical change are established that unlock longer and more meaningful continuities. The art of classical antiquity from c 600 BC to the fall of Rome in AD 410. The establishment of visual culture in Europe from 410 to 1527. The sack of papal Rome. European visual regimes from 1527 to 1770. The era of revolutions 1770 to 1914. Modernism and after 1914 to 2000. This new framework shows how the major religious and secular functions of art have been forged, sustained, transformed, revived and revolutionized over the ages; how the institutions of Church and State have consistently aspired to make art in their own image; and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create, patrons patronize, collectors collect, galleries exhibit, dealers deal and art historians write. The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp, one of the UK's most distinguished art historians. Whilst bringing their own expertise and vision to their sections, each author was also asked to relate their text to a number of unifying themes and issues including written evidence, physical contexts, patronage, viewing and reception techniques, gender and racial issues, centres and peripheries, media and condition. The notion of art and current presentations. Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America, space is also given to cross-fertilizations with other traditions including the art of Latin America, the Soviet Union, India, Africa and Afro-Caribbean, Australia and Canada. Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints. The result is a vibrant, vigorous and revolutionary account of Western art, serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students.

[The Banishment of Beverland](#) Karen Eline Hollewand, 2019-03-19. In 1679 Hadriaan Beverland 1650-1716 was banished from the province of Holland. Why was this humanist scholar exiled from one of the most tolerant parts of Europe in the seventeenth century? To answer this question, this book places Beverland's writings on sex, sin and scholarship in their historical context for the first time. Beverland argued that sexual lust was the original sin and highlighted the importance of sex in human nature, ancient history and his own society. His audacious works hit a raw nerve. Dutch theologians accused him of atheism; he was abandoned by his humanist colleagues and he was banished by the University of Leiden. By positioning Beverland's extraordinary scholarship in the context of the seventeenth-century Dutch Republic, this book examines how his radical studies challenged the intellectual, ecclesiastical and political elite, providing a fresh perspective upon the Dutch Republic in the last decades of its Golden Age.

The Moral Economy Laurence

Fontaine,2014-04-21 The Moral Economy examines the nexus of poverty credit and trust in early modern Europe It starts with an examination of poverty the need for credit and the lending practices of different social groups It then reconstructs the battles between the Churches and the State around the ban on usury and analyzes the institutions created to eradicate usury and the informal petty financial economy that developed as a result Laurence Fontaine unpacks the values that structured these lending practices namely the two competing cultures of credit that coexisted fought and sometimes merged the vibrant aristocratic culture and the capitalistic merchant culture More broadly Fontaine shows how economic trust between individuals was constructed in the early modern world By creating a dialogue between past and present and contrasting their definitions of poverty the role of the market and the mechanisms of microcredit Fontaine draws attention to the necessity of recognizing the different values that coexist in diverse political economies
