Scott, 2024-12-27 Holistically addressing the documented needs of practicing artists this book applies contemporary business management principles to the unique circumstances of people who make their living through creative expression Artists looking to forge a career have had to turn to either entrepreneurship resources or professional practice tools specific to a discipline such as studio arts or theatre but the business school entrepreneurial approach conflicts with the way artists make work and the unique structures of the artist environment while the professional practice focus neglects the necessary business theory and the wide range of ways artists create viable careers For the first time this book provides a comprehensive theoretical and practical foundation for understanding how artists create practices that endure Employing a strategic management framework the book spells out prevailing business strategies in marketing finance human resources and the legal environment from an arts specific and artist friendly point of view In a world of perpetually changing communication distribution and technology it also offers a lasting framework and understanding of the broader arts economy while highlighting contemporary tools and tactics to implement the theories in individual practices Practicing artists and students preparing for a career in any of the arts disciplines will welcome the artist s perspective and the many examples from the lives of working artists in a variety of endeavors while instructors in arts management administration and

entrepreneurship will appreciate this comprehensive text with research based pedagogy addressing their needs

Kockelmans,1985-04-30 This

book grew from a series of lectures presented in 1983 in the context of the Summer Program in Phenomenology at The Pennsylvania State University For these lectures I made use of notes and short essays which I had written between 1978 and 1982 during interdisciplinary seminars on Heidegger s later philosophy in general and on his philosophy of language and art in particular The participants in these seminars consisted of faculty members and graduate students concerned with the sciences the arts literature literary criticism art history art education and philosophy On both occasions I made a special effort to introduce those who did not yet have a specialized knowledge of Heidegger s philosophy to his later way of thinking In this effort I was guided by the conviction that we as a group had to aim for accuracy precision clarity faithfulness and depth while at the same time taking distance comparing Heidegger s views with ideas of other philosophers and thinkers and cultivating a proper sense of criticism Over the years it has become clear to me that among professional philosophers literary critics scholars concerned with art history and art education and scientists from various disciplines there are many who are particularly interested in Heidegger s philosophy of art I have also become convinced that many of these dedicated scholars often have difficulty in understanding Heidegger s lectures on art and art works This is understandable
