Example in this ebook I Sociality the basis of religion Its definition I We shall meet in the course of this work many different definitions that have at one time or another been given to religion Some were assigned from the point of view of physics others from that of metaphysics others from that of morals almost none from that of sociology And yet upon closer scrutiny the notion of a social bond between man and the powers superior to him but resembling him is precisely the point in which all religious conceptions are at one Man becomes truly religious in our judgment only when above the human society in which he lives he superimposes in his scheme of the world another society more powerful and more cultured a universal and so to speak a cosmic society The sphere of sociality which is one of the characteristics of humanity must be enlarged till it reaches to the stars Sociality is the firm foundation of the religious sentiment and a religious being might be defined as a being disposed to be sociable not only with all living creatures with whom experience makes him acquainted but also with the creatures of thought with whom he peoples the world That religion consists essentially in the establishment of a bond at first mythical and subsequently mystic in the first instance between man and the forces of the universe then between man and the universe itself and ultimately between man and the elements of the universe is distinctly the outcome of every study of religion but what we wish especially here to consider is the precise way in which this bond has been conceived Well it may appear more clearly at the close of this inquiry the religious bond has been conceived ex analogia societatis human the relations amicable and inimical of men to each other were employed first for the explanation of physical phenomena and natural forces then for the metaphysical explanation of the world of its creation conservation and government in short sociological laws were universalized and the state of war or peace which existed among men families tribes and nations was conceived as existing also among the volitions which were fancied to exist beneath or beyond the forces of nature A mythic or mystic sociology conceived as containing the secret of all things lies at the basis of all religions Religion is not simply the expression of an anthropomorphism animals and fantastic beings of various sorts have played no inconsiderable r le in different cults it is an imaginative extension a universalization of all the good or evil relations which exist among conscious beings of war and peace friendship and enmity obedience and rebellion protection and authority submission fear respect devotion love religion is a universal sociomorphism Social relations with animals with the dead intellectual and social relations with good and evil genii with the forces of nature are nothing more nor less than various forms of this universal sociology in which religion has sought to find the reason of things of physical phenomena such as thunder storm sickness death as well as of metaphysical relations the origin and destiny of things and of moral relations virtue vice law and sanction To be continue in this ebook **An Introduction to Hegel** Stephen Houlgate,2005-02-11 This classic introduction to one of the most influential modern thinkers G W F Hegel 1770 1831 has been made even more comprehensive through the addition of four new chapters New edition of a classic introduction to Hegel Enables students to engage with many aspects of Hegel s philosophy Covers the whole range of Hegel s mature thought Relates Hegel s ideas to other thinkers such as Luther

Descartes and Kant Offers a distinctive and challenging interpretation of Hegel's work *Spirit as Sculptor of the Human Organism* Rudolf Steiner, 2014 Let us be courageous and not draw back in fear when realities of the world of spirit that play into human life are unveiled You see the future of humanity depends on us learning to live with the world of spirit in the same way that we live with the physical world here on earth Rudolf Steiner In a wide ranging series of lectures Rudolf Steiner demonstrates the integral nature of spirit and matter and their manifold connections Speaking to audiences in London Holland Germany and Switzerland Steiner explains how through a process of evolving consciousness humanity lost its knowledge and direct experience of the spiritual sources of existence but now needs to reconnect with them Spirit is the essence and power of life which in Steiner's vivid image strikes a match in our whole being when we allow it to inform us fully Our world cannot be understood only in physical terms but is inseparable from the divine realities continually creating and sustaining it Reconnecting with the spirit calls upon us to heal the fractures between everyday consciousness and the metaphysical realms in which we are already embedded In Steiner's descriptions there is no end to the numerous reconnections possible between our past present and future between the active individualizing principle of the I and the physical human body it works upon and shapes between our physical actions and limb movements in one life and the forming or sculpting of our head in a future one and above all between the moral actions and insights we develop whilst alive on earth and our developing eye for spiritual reality in the life after death with all that this can mean for the future of human evolution Taking a truly holistic approach Rudolf Steiner tackles an eclectic series of subjects throughout these sixteen lectures all united by the common theme of rediscovering how spirit pervades life Apart from a focus on education in several lectures he discusses experiences during sleep the human spirit and soul between death and a new birth how spirit sculpts the human organism Christ from the perspective of anthroposophy the battle for human nature between luciferic and ahrimanic beings karma and the creation of conditions for our return to a new life on earth human experience of the etheric cosmos and the human being's faculties of hearing speaking singing walking and thinking Together these lectures offer a cornucopia of spiritual insights and wisdom for the present day *A Philosophical Critique of Thought* Zhengyu Sun, 2020-11-02 This book is mainly concerned with elaborating an account of the unique theoretical essence and activities of philosophy What manner of civilization should modern humans forge On what developmental path should a nation embark What lifestyle should each individual choose These are the most fundamental issues of our time Profoundly implicit in the choices outlined above is a deeper question What are the criteria of choice An examination of these criteria is a reflection on the premises constituting thought or a critique of the premises underlying thought Using a critique of the premises underlying thought as the basic idea and hermeneutic principle in philosophy will open a wider theoretical space for contemporary philosophy so as to avoid the predicament of being pseudo scientific or pseudo artistic It will also present contemporary philosophy with a realistic path of development for the task of reflecting on the criteria of choice This book seeks to formulate concrete philosophical

arguments for a critique of the basic beliefs logic modes concepts and philosophical ideas which constitute thought with the aim of demonstrating the vigorous self critique and inexhaustible theoretical space found in philosophical development This book provides a new principle of interpretation for understanding philosophy and in turn uses this principle to develop a critique of the premises underlying thought thereby furthering the contemporary development of philosophy This book encompasses a critique of the premises underlying thought which mainly includes the basic beliefs logic modes concepts and philosophical ideas constituting thought Such a critique should comprise five aspects First the basic beliefs constituting thought propose a critique of the identity of thought and being second the basic logic constituting thought refers to a critique of the formal intensional and practical logic of thought third the basic modes constituting thought denote a critique of the basic modes by which humans comprehend the world including commonsense religion art and science fourth the basic concepts constituting thought entail a critique centering on being the world history truth value and other basic concepts and finally the philosophical ideas constituting thought indicate a critique of philosophy itself A critique aligned on these five aspects will provide a general philosophical overview of the premise critique of thought Wonders of the World Rudolf Steiner,1996-09
