Congress, 2009 *Exploring the Math and Art Connection* Daniel Jarvis, Irene Naested, 2012 Daniel Jarvis and Irene Naested highlight the natural association between math and art in a series of practical ideas for the classroom because when students understand the math art connection their understanding and confidence increase in both subjects Through innovative teaching strategies and more than 100 rich learning experiences Jarvis and Naested give teachers a wealth of engaging tools to explore the math art connection with their own students This connection is established through examinations of natural and human designed objects from how pine cone scales spiral out in a Fibonacci sequence to how geometric shapes combine in architecture to form some of the most beautiful structures on

the planet **Co-Creative Placekeeping in Los Angeles** Brettany Shannon, David C. Sloane, Anne Bray, 2023-12-05 Co Creative Placekeeping in Los Angeles is a novel examination of Los Angeles based socially engaged art SEA practitioners equitable placekeeping efforts A new concept equitable placekeeping describes the inclination of historically marginalized community members to steward their neighborhood s development improve local amenities engage in social and cultural production and assert a mutual sense of self definition and the efforts of SEA artists to aid them Emerging from in depth interviews with eight Southern California artists and teams Co Creative reveals how artists engage community members sustain relationships and defy the presumption that residents cannot speak for themselves Drawing on these artists and theoretical analysis of their praxes the book explicates equitable community engagement by exploring not just the creative projects but also the underlying phenomena that inspire and sustain them community engagement relationships and defiance What further sets this book apart is how it deviates from the conventional who and what of SEA projects to foreground the how and the why that inspire and necessitate collectively creative action Co Creative is for anyone studying arts based community development and gentrification given it complicates and enriches the current conversation about art s undeniable and increasingly controversial role in neighborhood change It will also be of interest to researchers and students of urban studies

The Elusive Synthesis: Aesthetics and Science A.I. Tauber, 2012-12-06 The tension between art and science may be traced back to the Greeks What became natural philosophy and later science has traditionally been posed as a fundamental alternative to poetry and art It is a theme that has commanded central attention in Western thought as it captures the ancient conflict of Apollo and Dionysus over what deserves to order our thought and serve as the aspiration of our cultural efforts The modern schism between art and science was again clearly articulated in the Romantic period and seemingly grew to a crescendo fifty years ago as a result of the debate concerning atomic power The discussion has not abated in the physical sciences and in fact has dramatically expanded most prominently into the domains of ecology and medicine Issues concerning the role of science in modern society although heavily political must be regarded at heart as deeply embedded in our cultural values Although each generation addresses them anew the philosophical problems which lay at the foundation of these fundamental concerns always appear fresh and difficult This anthology of original essays considers how science might have a greater commonality with art than was perhaps realized in a more positivist era The contributors are concerned with how the aesthetic participates in science both as a factor in constructing theory and influencing practice The collection is thus no less than a spectrum of how Beauty and Science might be regarded through the same prism
