Science and Technology in a Developing World T. Shinn, J. Spaapen, V.V. Krishna, 2013-04-17 block possible Soviet expansion by mobilizing European democracies the policy soon extended to some developing countries in Asia and Latin America In response the USSR gradually initiated development programs for newly independent nations in Asia and Africa In this context super power rivalry operated in the South to i expand spheres of influence and control ii guard Southern nations from the influence and incursions launched by the opposed camp iii stimulate indigenous development With few exceptions Southern nations provided little input to the definition and execution of North South dynamics during this period In the case of Africa and to some extent Asia the acquisition of independence was so recent and often sudden that there was little time to reflect on the kind of policies and measures needed to build balanced relations with the former mother country In Latin America the Monroe Doctrine had long insured that the region was a virtual captive of the US Aid for development was contingent on conformity to US political and economic interests The cognitive component of South North dealings strongly reflected the two above mentioned dispositions The relative lack of political experience in the South and the dearth of an organized and sizable intellectual academic community meant that there were few cognitive and human resources for undertaking careful study and analysis of the conditions and needs of development from a Southern perspective influential

Romijn,1998-11-18 An authoritative examination of how small firms in developing countries acquire technological capability the knowledge and skills required to operate technology effectively and to adapt it to local conditions It fills a gap in the established literature on technological capability which has neglected the small scale sector in spite of the important role it plays in employment generation The author develops a methodology for a quantitative assessment of the learning process using case material from the small scale capital goods sector in Pakistan s Punjab Province **Technology and Contemporary Life** P.T.
