Untaming the Frontier in Anthropology, Archaeology, and History Bradley J. Parker, Lars Rodseth, 2023-01-24

Despite a half century of attempts by social scientists to compare frontiers around the world the study of these regions is still closely associated with the nineteenth century American West and the work of Frederick Jackson Turner As a result the very concept of the frontier is bound up in Victorian notions of manifest destiny and rugged individualism The frontier it would seem has been tamed This book seeks to open a new debate about the processes of frontier history in a variety of cultural contexts untaming the frontier as an analytic concept and releasing it in a range of unfamiliar settings Drawing on examples from over four millennia it shows that throughout history societies have been formed and transformed in relation to their frontiers and that no one historical case represents the normal or typical frontier pattern The contributors historians anthropologists and archaeologists present numerous examples of the frontier as a shifting zone of innovation and recombination through which cultural materials from many sources have been unpredictably channeled and transformed At the same time they reveal recurring processes of frontier history that enable world historical comparison the emergence of the frontier in relation to a core area the mutually structuring interactions between frontier and core and the development of social exchange merger or conflict between previously separate populations brought together on the frontier Any frontier situation has many dimensions and each of the chapters highlights one or more of these from the physical and ideological aspects of Egypt's Nubian frontier to the military and cultural components of Inka outposts in Bolivia to the shifting agrarian religious and political boundaries in Bengal They explore cases in which the centripetal forces at work in frontier zones have resulted in cultural hybridization or creolization and in some instances show how satellite settlements on the frontiers of core polities themselves develop into new core polities Each of the chapters suggests that frontiers are shaped in critical ways by topography climate vegetation and the availability of water and other strategic resources and most also consider cases of population shifts within or through a frontier zone As these studies reveal transnationalism in today's world can best be understood as an extension of frontier processes that have developed over thousands of years This book's interdisciplinary perspective challenges readers to look beyond their own fields of interest to reconsider the true nature and meaning of frontiers

New Frontiers in the Neolithic Archaeology of Taiwan (5600-1800 BP) Su-chiu Kuo, 2019-12-05 This book summarizes the systematic research on the Neolithic cultures of Taiwan based on the latest archaeological discoveries and focusing on the maritime interactions between mainland southeast China Taiwan and southeast Asia during 5600-1800 BP The study demonstrates and sheds light on the distinctiveness of Taiwan's Neolithic cultures their interactions with the external cultures of its surrounding regions the maritime cultural diffusion and early seafaring across sea regions like the Taiwan Strait Bashi channel and South China Sea Drawing on the author's deep understanding of Taiwan and its surrounding

regions the book also incorporates recent archeological findings by Taiwanese researchers Further based on a new reconstruction of the spatiotemporal framework of Taiwanese prehistoric cultures the chronologically arranged chapters discuss Neolithic cultures of the early middle late and final stage of this island region revealing the prehistoric cultural development regional typology and their maritime interactions with surrounding regions The typological study of the native traits and external cultural influences of each stage of Neolithic culture shows the prehistoric and early history of this key stepping stone in the Asia Pacific region

Roman Frontier Archaeology - in Britain and Beyond Nick Hodgson,Bill Griffiths,2022-11-25 Contributions by leading archaeologists and historians pay tribute to Paul Bidwell admired for his ground breaking work both in the south west and the military north of Roman Britain This collection will be essential reading for anyone with an interest in either the civil or military aspects of Roman Britain or the frontiers of the Roman empire

Rethinking Puerto Rican Precolonial History Reniel Rodríguez Ramos,2010-07-19 Focuses on the successive indigenous cultures of Puerto Rico prior to 1493 The history of Puerto Rico has usually been envisioned as a sequence of colonizations various indigenous peoples from Archaic through Ta no were successively invaded assimilated or eliminated followed by the Spanish entrada which was then modified by African traditions and since 1898 by the United States The truth is more complex but in many ways Puerto Rico remains one of the last colonies in the world This volume focuses on the successive indigenous cultures of Puerto Rico prior to 1493 Traditional studies of the cultures of indigenous peoples of the Caribbean have centered on ceramic studies based on the archaeological model developed by Irving Rouse which has guided Caribbean archaeology for decades Rodr guez Ramos departs from this methodology by implementing lithics as the primary unit for tracing the origins and developments of the indigenous peoples of Puerto Rico Analyzing the technological styles involved in the production of stone artifacts in the island through time as well as the evaluation of an inventory of more than 500 radiocarbon dates recovered since Rouse s model emerged the author presents a truly innovative study revealing alternative perspectives on Puerto Rico s pre Columbian culture historical sequence By applying a multiscalar design he not only not only provides an analysis of the plural ways in which the precolonial peoples of the island interacted and negotiated their identities but also shows how the cultural landscapes of Puerto Rico the Antilles and the Greater Caribbean shaped and were shaped by mutually constituting processes through time

Boundaries, Borders and Frontiers in Archaeology Bryan Feuer,2016-02-17 Until fairly recently archaeological research has been directed primarily toward the centers of societies rather than their perimeters Yet frontiers and borders precisely because they are peripheral promote interaction between people of different polities and cultures with a wide range of potential outcomes Much work has begun to redress this disparity of focus Drawing on contemporary and ethnographic accounts historical data and archaeological evidence this book covers more than 30 years of research on boundaries borders

and frontiers beginning with The Northern Mycenaean Border in Thessaly in 1983 The author discusses various theoretical and methodological issues concerning peripheries as they apply to the archaeological record Political economic social and cultural processes in border and frontier zones are described in detail Three case study societies are examined China Rome and Mycenaean Greece **Anthropological Perspectives on Technology** Michael B. Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana The Oxford Handbook of North American Archaeology Timothy R. Pauketat, 2012-02-23 The Oxford Handbook of North American Archaeology reviews the continent's first and last foragers farmers and great pre Columbian civic and ceremonial centers from Chaco Canyon to Moundville and beyond Southtowns Connector/Buffalo Outer Harbor Project, Erie County , 2006 *Advances in Andean Archaeology* David L. Icons of Power Nicholas J. Saunders, 2013-04-15 Icons of Power investigates why the image of the cat has been such a potent symbol in the art religion and mythology of indigenous American cultures for three thousand years The jaguar and the puma epitomize ideas of sacrifice cannibalism war and status in a startling array of graphic and enduring images Natural and supernatural felines inhabit a shape shifting world of sorcery and spiritual power revealing the shamanic nature of Amerindian world views This pioneering collection offers a unique pan American assessment of the feline icon through the diversity of cultural interpretations but also striking parallels in its associations with hunters warriors kingship fertility and the sacred nature of political power Evidence is drawn from the pre Columbian Aztec and Maya of Mexico Peruvian and Panamanian civilizations through recent pueblo and Iroquois cultures of North America to current Amazonian and Andean societies This well illustrated volume is essential reading for all who are interested in the symbolic construction of animal

icons their variable meanings and their place in a natural world conceived through the lens of culture The cross disciplinary approach embraces archaeology anthropology and art history

Gold and Power in Ancient Costa Rica, Panama, and Colombia Jeffrey Quilter, John W. Hoopes, 2003 The lands between Mesoamerica and the Central Andes are famed for the rich diversity of ancient cultures that inhabited them Throughout this vast region from about AD 700 until the sixteenth century Spanish invasion a rich and varied tradition of goldworking was practiced The amount of gold produced and worn by native inhabitants was so great that Columbus dubbed the last New World shores he sailed as Costa Rica the Rich Coast Despite the long recognized importance of the region in its contribution to Pre Columbian culture very few books are readily available especially in English on these lands of gold Gold and Power in Ancient Costa Rica Panama and Colombia now fills that gap with eleven articles by leading scholars in the field Issues of culture change the nature of chiefdom societies long distance trade and transport ideologies of value and the technologies of goldworking are covered in these essays as are the role of metals as expressions and materializations of spiritual political and economic power These topics are accompanied by new information on the role of stone statuary and lapidary work craft and trade specialization and many more topics including a reevaluation of the concept of the Intermediate Area Collectively the volume provides a new perspective on the prehistory of these lands and includes articles by Latin American scholars whose writings have rarely been published in English

A History of the Congress of Roman Frontier Studies 1949-2022 David J. Breeze, Tatiana Ivleva, Rebecca H. Jones, Andreas Thiel, 2022-08-25 This volume celebrates the twenty fifth Congress of Roman Frontier Studies It presents the history of the congress accompanied by photographs and reminiscences from participants a story populated by many of the well known archaeologists of the last 75 years and indeed earlier as the genesis of the Congress lies in the inter War years

The Gran Chichimeca Jonathan E. Reyman, 1995 This text contains essays on the archaeology and ethnohistory of Northern Mesoamerica Topics covered include the early setting the frontiers of Mesoamerica the heartland of the Gran Chichimeca Tepecano Quelite cultivation the Loma San Gabriel culture and others

The Late Archaic across the Borderlands Bradley J. Vierra, 2010-01-01 Why and when human societies shifted from nomadic hunting and gathering to settled agriculture engages the interest of scholars around the world One of the most fruitful areas in which to study this issue is the North American Southwest where Late Archaic inhabitants of the Sonoran and Chihuahuan Deserts of Mexico Arizona and New Mexico turned to farming while their counterparts in Trans Pecos and South Texas continued to forage By investigating the environmental biological and cultural factors that led to these differing patterns of development we can identify some of the necessary conditions for the rise of agriculture and the corresponding evolution of village life The twelve papers in this volume synthesize previous and ongoing research and offer new theoretical models to provide the most up to date picture of life during the Late Archaic from 3 000 to 1 500 years ago across the entire North American Borderlands Some of the papers

focus on specific research topics such as stone tool technology and mobility patterns Others study the development of agriculture across whole regions within the Borderlands The two concluding papers trace pan regional patterns in the adoption of farming and also link them to the growth of agriculture in other parts of the world

Subfloor Pits and the Archaeology of Slavery in Colonial Virginia Patricia Samford, 2007-12-16 This book discusses the daily life and culture of enslaved Africans and their descendants Enslaved Africans and their descendants comprised a significant portion of colonial Virginia populations with most living on rural slave quarters adjacent to the agricultural fields in which they labored Archaeological excavations into these home sites have provided unique windows into the daily lifeways and culture of these early inhabitants subfloor pits beneath the houses The most common explanations of the functions of these pits are as storage places for personal belongings or root vegetables and some contextual and ethnohistoric data suggest they may have served as West African style shrines Through analysis of 103 subfloor pits dating from the 17th through mid 19th centuries Samford reveals how data on shape location surface area and depth as well as contextual analysis of artifact assemblages can show how subfloor pits functioned for the enslaved Archaeology reveals the material circumstances of slaves lives which in turn opens the door to illuminating other aspects of life spirituality symbolic meanings assigned to material goods social life individual and group agency and acts of resistance and accommodation about how West African possibly Igbo cultural traditions were maintained and transformed in the Virginia Chesapeake
