Archæology (London, England), 1893 Archaeology of Spiritualities Kathryn Rountree, Christine Morris, Alan A. D. Peatfield, 2012-05-23 Archaeology of Spiritualities provides a fresh exploration of the interface between archaeology and religion spirituality Archaeological approaches to the study of religion have typically and often unconsciously drawn on western paradigms especially Judaeo Christian mono theistic frameworks and academic rationalisations Archaeologists have rarely reflected on how these approaches have framed and constrained their choices of methodologies research questions hypotheses definitions interpretations and analyses and have neglected an important dimension of religion the human experience of the numinous the power presence or experience of the supernatural Within the religions of many of the world s peoples sacred experiences particularly in relation to sacred landscapes and beings connected with those landscapes are often given greater emphasis while doctrine and beliefs are relatively less important Archaeology of Spiritualities asks how such experiences might be discerned in the archaeological record how do we recognize and investigate other forms of religious or spiritual experience in the remains of the past The volume opens up a space to explore critically and reflexively the encounter between archaeology and diverse cultural expressions of spirituality It showcases experiential and experimental methodologies in this area of the discipline an unconventional approach within the archaeology of religion Thus Archaeology of Spiritualities offers a unique timely and innovative contribution one that is also challenging and stimulating It is a great resource to archaeologists historians religious scholars and others interested in cultural and religious heritage

 Jorge, Julian Tomas, 2009-01-14 Archaeology is intimately connected to the modern regime of vision A concern with optics was
 fundamental to the Scientific Revolution and informed the moral theories of the Enlightenment And from its inception
 archaeology was concerned with practices of depiction and classification that were profoundly scopic in character Drawing
 on both the visual arts and the depictive practices of the sciences employing conventionalised forms of illustration
 photography and spatial technologies archaeology presents a paradigm of visualised knowledge However a number of
 thinkers from Jean Paul Sartre onwards have cautioned that vision presents at once a partial and a politicised way of
 apprehending the world In this volume authors from archaeology and other disciplines address the problems that face the
 study of the past in an era in which realist modes of representation and the philosophies in which they are grounded in are
 increasingly open to question *Archaeology* Brian M. Fagan, 2016-04-01 Method and Theory in Archaeology Archaeology A
 Brief Introduction is an introduction to the fundamental principles of method and theory in archaeology exposing students to

archaeology as a career The text begins by covering the goals of archaeology and then moves on to consider the basic concepts of culture time and space by discussing the finding and excavation of archaeological sites By providing a distinct emphasis on the ethics behind archaeology and how we should act as stewards of the finite records of the human past Archaeology A Brief Introduction continues to be a book with a truly international perspective not simply focusing on North America or Europe Teaching and Learning Experience Improve Critical Thinking Archaeology A Brief Introduction s Archaeology and You chapter provides students with career advice in an era when archaeology is transitioning from predominantly academic to professional Engage Students Each chapter within Archaeology A Brief Introduction highlights important finds that have shaped our archaeological perspective and a global perspective that shows students that archaeology is the most global of all sciences encompassing all of humanity

Archaeological Practice as Politics and Ethics John Carman,2024-08-29 This book is of relevance to all archaeologists and all others concerned with how an interest in the past impacts on the present This book explores the manner in which archaeology as a discipline and a field of endeavour contributes to the modern world The focus throughout the book is on practices the range of different things that archaeologists do and how they do and have done it in order to explore the field as a distinctive aspect of social practice over time It also concerns the structures social political economic professional philosophical in which archaeology is performed and the consequences for the discipline and its practitioners Throughout there is a concern especially with archaeology as a field of political and ethical decision making aspects well recognised by practitioners but rarely emphasised The book both asks and answers questions about the perception of archaeology from both within and outside the field The book draws widely on previous work by the author and others looking at the techniques of the field the people involved the political and social impacts both on and by the field In doing so it seeks to bring these different perspectives together to create a more holistic idea of what archaeology is has been and could be The book is offered to those outside the field as a justification for archaeology a field coming under increasing pressure from those who consider it as so many humanities and social science disciplines as an expensive luxury
