Archaeology And Ancient History Breaking Down The Boundaries:

Archaeology and Ancient History Eberhard W. Sauer, 2004-07-31 This collection of pieces from an international range of contributors explores in detail the separation of the human past into history and archaeology *Archaeology and History in Roman, Medieval and Post-Medieval Greece* Linda Jones Hall, 2016-12-05 The essays in *Archaeology and History in Roman Medieval and Post Medieval Greece* honor the contributions of Timothy E Gregory to our understanding of Greece from the Roman period to modern times Evoking Gregory's diverse interests the volume brings together anthropologists art historians archaeologists historians and philologists to address such contested topics as the end of Antiquity the so called Byzantine Dark Ages the contours of the emerging Byzantine civilization and identity in post Medieval Greece These papers demonstrate the continued vitality of both traditional and innovative approaches to the study of material culture and emphasise that historical interpretation should be the product of methodological self awareness In particular this volume shows how the study of the material culture of post Classical Greece over the last 30 years has made significant contributions to both the larger archaeological and historical discourse The essays in this volume are organized under three headings Archaeology and Method the Archaeology of Identity and the Changing Landscape which highlight three main focuses of Gregory's research Each essay interlaces new analyses with the contributions Gregory has made to our understanding of Medieval and Post Medieval Greece Read together these essays not only make a significant contribution to how we understand the post Classical Greek world but also to how we study the material culture of the Mediterranean world more broadly

Housing in the Ancient Mediterranean World J. A. Baird, April Pudsey, 2022-07-21 Explores the possible dialogues between textual and archaeological sources in studying housing in the ancient Mediterranean world *People and Spaces in Roman Military Bases* Penelope M. Allison, 2013-10-31 This study uses artefact distribution analyses to investigate the activities that took place inside early Roman imperial military bases Focusing especially on non combat activities it explores the lives of families and other support personnel who are widely assumed to have inhabited civilian settlements outside the fortification walls Spatial analyses in GIS type environments are used to develop fresh perspectives on the range of people who lived within the walls of these military establishments the various industrial commercial domestic and leisure activities in which they and combat personnel were involved and the socio spatial organisation of these activities and these establishments The book includes examples of both legionary fortresses and auxiliary forts from the German provinces to demonstrate that more material cultural approaches to the artefact assemblages from these sites give greater insights into how these military communities operated and demonstrate the problems of ascribing functions to buildings without investigating the full material record

Leading the Roman Army Jonathan Eaton, 2020-07-30 A historian and archeological scholar examines the complex relationship between Roman emperors and their armies For the emperors of Ancient Rome effective political management of the army was vital to the overall stability of the empire In *Leading the*

Roman Army historian Jonathan Mark Eaton examines how emperors endeavored to control the military from the battle of Actium in 31 BC to the demise of the Severan dynasty in AD 235. This study draws on the latest evidence from archaeological, epigraphic, literary, and numismatic sources on the relationship between the emperor and his soldiers. It demonstrates that the emperor was not only the army's commander in chief but also their patron and benefactor, even after their discharge from military service. With forces dispersed along the frontiers of the empire, the emperor needed a strong military hierarchy to impose discipline. He also needed to ensure the loyalty of his officers by building mutually beneficial relationships with them. To this end, the imperial army became a complex network of loyalty ties which protected the emperor from military subversion.

Dariali: The 'Caspian Gates' in the Caucasus from Antiquity to the Age of the Huns and the Middle Ages
Eberhard Sauer, 2020-04-30

The Huns invading through Dariali Gorge on the modern-day border between Russia and Georgia in AD 395 and 515 spread terror across the late antique world. Was this the prelude to the apocalypse? Prophecies foresaw a future Hunnic onslaught via the same mountain pass, bringing about the end of the world. Humanity's fate depended on a gated barrier deep in Europe's highest and most forbidding mountain chain. Centuries before the emergence of such apocalyptic beliefs, the gorge had reached world fame. It was the target of a planned military expedition by the Emperor Nero. Chained to the dramatic sheer cliffs framing the narrow passage, the mythical fire thief Prometheus suffered severe punishment; his liver devoured by an eagle. It was known under multiple names, most commonly the Caspian or Alan Gates. Featuring in the works of literary giants, no other mountain pass in the ancient and medieval world matches Dariali's fame. Yet little was known about the materiality of this mythical place. A team of archaeologists has now shed much new light on the major gorge, blocking fort, and a barrier wall on a steep rocky ridge further north. The walls still standing today were built around the time of the first major Hunnic invasion in the late fourth century, when the Caucasus defences feature increasingly prominently in negotiations between the Great Powers of Persia and Rome. In its endeavour to strongly fortify the strategic mountain pass through the Central Caucasus, the workforce erased most traces of earlier occupation. The Persian-built bastion saw heavy occupation for 600 years. Its multi-faith medieval garrison controlled Trans-Caucasian traffic. Everyday objects and human remains reveal harsh living conditions and close connections to the Muslim South as well as the steppe world of the north. The Caspian Gates explains how a highly strategic rock has played a pivotal role in world history from Classical Antiquity into the twentieth century.

Roman Archaeology for Historians Ray Laurence, 2012-06-25

Roman Archaeology for Historians provides students of Roman history with a guide to the contribution of archaeology to the study of their subject. It discusses the issues with the use of material and textual evidence to explain the Roman past and the importance of viewing this evidence in context. It also surveys the different approaches to the archaeological material of the period and examines key themes that have shaped Roman archaeology. At the heart of the book lies the question of how archaeological material can be interpreted and its relevance for the study of ancient history. It includes discussion of the

study of landscape change urban topography the economy the nature of cities new approaches to skeletal evidence and artefacts in museums Along the way readers gain access to new findings and key sites many of which have not been discussed in English before and many for which access may only be gained from technical reports Roman Archaeology for Historians provides an accessible guide to the development of archaeology as a discipline and how the use of archaeological evidence of the Roman world can enrich the study of ancient history while at the same time encouraging the integration of material evidence into the study of the period's history This work is a key resource for students of ancient history and for those studying the archaeology of the Roman period

Sailing into the Past Jenny Bennett, 2009-06-18 Until recently there was little practical knowledge of the ships of the distant past We could only surmise as to the manner in which a Viking ship sailed or how fast a Greek trireme could be rowed The building of accurate replicas over the past generation has changed all that and what has been learnt about the ships and boats of our ancestors has radically changed our perceptions of sailing and voyaging This beautifully illustrated new book charts those discoveries The world's leading authorities look at individual replicas and discuss what they have taught us Boris Rankov and John Coates for example discuss the Greek trireme while Antonia Macarthur outlines the lessons learnt on Cook's Endeavour Each chapter deals with a particular vessel and construction sail plans and the intended role are covered before an analysis of sailing performance is discussed Windward ability seakindliness speed and ease of handling are all dealt with General chapters by Richard Woodman and Sean McGrail set the scene A fascinating work which offers the most accessible view yet as to how the ships of our seafaring forbears affected the manner in which they traded fought and explored

[The Oxford Handbook of Greek and Roman Art and Architecture](#) Clemente Marconi, 2015 An innovative and up to date synopsis of the field of Greek and Roman Art and Architecture filling a genuine need in the literature

'a whole world of things very memorable' Martin Henig, Nigel Ramsay, 2024-06-27 Julian Munby has gained a reputation over half a century in many branches of archaeological and historical knowledge His lively and warm character and sense of fun has made him many friends who also in some sense feel they are his pupils and this collection of papers has been assembled as a tribute in honour of his 70th birthday

Roman Domestic Art and Early House Churches David L. Balch, 2008 Pompeii Herculaneum and Rome have yielded hundreds of wall paintings from domestic buildings Greek myths and tragedies especially by Euripides were visually represented Balch presents an interdisciplinary study inquiring what earliest Jews and Christians in such houses might have been seeing as they read and interpreted scripture and performed core rituals especially the Eucharist This recent study of Roman domestic architecture suggests new perspectives on the social history of early Christianity

The Archaeology of Medicine in the Greco-Roman World Patricia A. Baker, 2013-09-30 This book teaches students and scholars of Greco-Roman medical history how to use and critically assess archaeological materials Ancient medicine is a subject dominated by textual sources yet there is a wealth of archaeological remains that can be used to broaden our understanding of medicine in the past In order to

use the information properly this book explains how to ask questions of an archaeological nature how to access different types of archaeological materials and how to overcome problems the researcher might face It also acts as an introduction to the archaeology of medicine for archaeologists interested in this aspect of their subject Although the focus is on the Greco Roman period the methods and theories explained within the text can be applied to other periods in history The areas covered include text as material culture images artifacts spaces of medicine and science and archaeology **Traces of the Past** Karen Bassi,2016-08-17 An innovative multidisciplinary study of the relationship between visual perception and temporal meaning in ancient Greek literature and history writing The Roman Invasion of Britain Birgitta Hoffmann,2013-08-21 The purpose of this book is to take what we think we know about the Roman Conquest of Britain from historical sources and compare it with the archaeological evidence which is often contradictory Archaeologists and historians all too often work in complete isolation from each other and this book hopes to show the dangers of neglecting either form of evidence In the process it challenges much received wisdom about the history of Roman Britain Birgitta Hoffmann tackles the subject by taking a number of major events or episodes such as Caesar s incursions Claudius invasion Boudicca s revolt presenting the accepted narrative as derived from historical sources and then presenting the archaeological evidence for the same The result of this innovative approach is a book full of surprising and controversial conclusions that will appeal to the general reader as well as those studying or teaching courses on ancient history or archaeology Sharing Archaeology Peter Stone,Zhao Hui,2014-08-13 As a discipline Archaeology has developed rapidly over the last half century The increase in so called public archaeology with its wide range of television programming community projects newspaper articles and enhanced site based interpretation has taken archaeology from a closed academic discipline of interest to a tiny minority to a topic of increasing interest to the general public This book explores how archaeologists share information with specialists from other disciplines working within archaeology other archaeologists and a range of non specialist groups It emphasises that to adequately address contemporary levels of interest in their subject archaeologists must work alongside and trust experts with an array of different skills and specializations Drawing on case studies from eleven countries Sharing Archaeology explores a wide range of issues raised as the result of archaeologists communication both within and outside the discipline Examining best practice with wider implications and uses beyond the specified case studies the chapters in this book raise questions as well as answers provoking a critical evaluation of how best to interact with varied audiences and enhance sharing of archaeology **The Oxford Handbook of Early Christian Archaeology** David K. Pettegrew,William Rodney Caraher,Thomas W. Davis,2019 This handbook brings together work by leading scholars of the archaeology of early Christianity in the Mediterranean and surrounding regions The 34 essays to this volume ground the history culture and society of the first seven centuries of Christianity in the latest currents of archaeological method theory and research Tradition, Archaeological Heritage Protection and Communities in the Limpopo Province of South Africa Innocent

Pikirayi, 2011 This book captures community voices in matters relating to their relationship with specific archaeological heritage sites and landscapes in the Limpopo Province of South Africa Focusing on the stonewalled archaeological heritage associated with Venda speakers and the reburial in 2008 of human remains excavated by the University of Pretoria from the cultural landscape of Mapungubwe the book attempts to establish why archaeology and cultural heritage conservation struggle for relevance in South Africa today In articulating the relevance of archaeology in South Africa in particular and southern Africa in general and in the context of public or community based archaeology the book explores how communities and the public interact use and negotiate with their pasts The research critiques the notion of archaeological heritage conservation and attempts to understand cultural heritage conservation from the perspectives of descendant communities The book further exposes the conflict between cultural heritage protection efforts and modern development and questions the role of such efforts given the challenges of unemployment social inequality and poverty in democratic South Africa The book is also about community engagement in archaeology specifically in matters relating to access to cultural heritage resources This study suggests that there is scope for community archaeology to take centre stage and drive future directions in archaeology if archaeologists change their approach in dealing with communities Researchers are challenged in this study to rethink the notion of heritage to debate the objectives behind cultural heritage conservation and to critically reexamine the relevance of archaeology today This study suggests that the conflicting positions between heritage managers archaeologists and descendant communities may be resolved through sharing of tradition with the present

Historical Evidence and Argument David Henige, 2006-01-20 Historians know about the past because they examine the evidence But what exactly is evidence how do historians know what it means and how can we trust them to get it right Historian David Henige tackles such questions of historical reliability head on in his skeptical unsparing and acerbically witty Historical Evidence and Argument Systematic doubt is his watchword and he practices what he preaches through a variety of insightful assessments of historical controversies for example over the dating of artifacts and the textual analysis of translated documents Skepticism Henige contends forces us to recognize the limits of our knowledge but is also a positive force that stimulates new scholarship to counter it

Roman Seas Justin Leidwanger, 2020 Drawing together maritime landscape studies and network analysis this book offers an archaeological exploration of seaborne economy and connectivity across the Roman eastern Mediterranean where the material record of shipwrecks and ports reveals multiple evolving regional and interregional systems of interaction
