Armed Forces In Harms Way:

The Armed Forces Covenant in action? Part 1: Military casualties Great Britain: Parliament: House of Commons: Defence Committee, 2011-12-15 The Government must show how the excellent medical care being delivered to injured service personnel will continue long after the memory of the Afghan Operation fades This report which gives praise to the first class medical treatment provided for the Armed Forces questions whether the support for injured personnel will be sustainable over the long term In particular the committee is concerned about the number of people who may go on to develop severe and life limiting physical mental health alcohol or neurological problems There is still a question mark over whether the Government as a whole fully understands the likely future demands and related costs [Legislative Calendar](#) United States. Harm's Way experts investigate the psychological impact of how warriors live and survive in combat duty. They address the combat preparation of servicemen and women, their support systems, and their interpersonal and intrapersonal experiences. The text maintains a focus on cognitive behavioral interventions for treating various combat-related disorders and addresses psychological health and adjustment after leaving the battlefield. The text is logically organized for easy reading and reference and covers often overlooked topics such as preparation and training of service personnel, women in combat, and the indirect effects of combat stress on family. This book is written by clinicians who have in some ways experienced what they write about and resonates with mental health professionals, servicemen and women, and their families. Any clinician hoping to treat a serviceman or woman effectively cannot afford to overlook this book.

The Clausewitzian Dictum and the Future of Western Military Strategy. Gert de Nooy, 2023-09-14. This book aims at defining a rationale for the continued use of military armed forces by states. Central to this publication are the answers to fundamental questions pertaining to the convention of war as formulated by Martin van Creveld: to define just who is allowed to kill whom, for what ends, under what circumstances, and by what means. Above all, the authors take into account developments and trends within the elements of the Clausewitzian trinity supporting the Westphalian nation-state: The People or the Society, The Government, and The Armed Forces or The Military. The change in the Atlantic European security environment and the effects that this will have on the form and content of national and multilateral security strategies and doctrines form the background to this publication. Moreover, the possible impact of societal changes on West European states as a consequence of European integration are analysed and discussed. Finally, the consequences of out-of-area and police-type functions for armed forces, in addition to the classical defence role, are related to the size and composition of future forces.

First in Chapters Two, Martin van Creveld; and Three, Jan Geert Siccama, the Clausewitzian dictum/trinitarian theory and the absence of alternative theories of warfare are discussed. Next, Chapters Four, Zeev Maoz; and Five, Jan van der Meulen, deal with societal changes and trends within Western Society at large which affect the future use of armed forces. Chapters Six, Koen Koch; and Seven, Jaap de Wilde, concentrate on the future relevance of the nation-state and the governing bodies in relation to the ongoing process of European political integration and multilateralization of diplomatic interaction. Chapters Eight, Jan Willem Honig; Nine, Kees Homan; and Ten, Robert Bunker, address how present-day changes and trends affect the armed forces. Respectively, the authors address issues relating to

military strategy personnel and technology Finally Chapter Eleven Gert de Nooy and Rienk Terpstra provides an overview of topical highlights and tentative conclusions emanating from both the chapters and the discussions held during the workshop held in conjunction with this book This book will be of interest to European policy makers defence planners officers under training in military and defence academies and students of international relations political science and security

The Constitution and the Conduct of American Foreign Policy David Gray Adler, Larry Nelson George, 1996 In this provocative and readable volume eleven leading constitutional authorities challenge business as usual in American foreign policymaking For far too long they contend Americans have acquiesced to presidential claims to sweeping executive powers in foreign affairs thanks to imperial minded presidents a weak willed Congress and neglectful scholars These authors forcefully argue that the president is not the supreme crafter of foreign policy and that Congress must provide more than a rubber stamp for the president s agenda Unilateral presidential control of foreign relations they warn can pose a grave threat to our nation s welfare and is simply without constitutional warrant Combining constitutional theory with keen historical insights these authors illuminate the roots of presidential abuse of executive power and remind us of the past and potential costs of such disregard for our unique system of checks and balances An essential guide for all concerned citizens and members of Congress this volume should help revive a proper understanding of this crucial dimension of American democracy

The Evolution of the US Air Force Israel Guy, 2024-08-05 This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars which is shown to be a result of its organizational culture The U S Air Force is probably the most powerful military force in history both in its destructive firepower and in its ability to project it globally Yet despite its unparalleled power the Air Force entered its first three pivotal conflicts World War II the Korean War and the Vietnam War unprepared But surprisingly it was remarkably well prepared for its fourth major war the Gulf War of 1991 Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war Surprisingly there is such a factor which was quite prominent in the Air Force s complex

identity its organizational culture Besides providing a historical description of the Air Force this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war It also shows that when the organizational culture changed the Air Force changed its focus and arrived prepared for the following war the 1991 Gulf War This book will be of interest to students of air power strategic studies US public policy and security studies in general
