Army In A Changing World The Role Of Organizational Vision June 1990 R 3882 A:

The Icarus Syndrome Carl H. Builder, 2017-07-12 At the end of the Reagan era many in the U S Air Force began to express their concerns about the health of their institution They questioned whether the Air Force had lost its sense of direction its confidence its values even its future For some these concerns reflected nothing more than the maturation of the most youthful of America s military institutions For others it was a crisis of spirit that threatened the hard won independence of the Air Force Although the diagnoses for this malaise are as numerous as its symptoms The Icarus Syndrome points a finger at the abandonment of air power theory sometime in the late 1950s to early 1960s as the single taproot cause of the problems That provocative diagnosis is followed by an equally provocative prescription the Air Force must follow to regain its institutional health Author Carl H Builder begins with an overview of this crisis of values within the Air Force along with a litany of concerns about what seems to have gone wrong within that institution The history of the U S Air Force along with the role played in it by air power theory is explored and is used to support Builder s thesis The remainder of the book is an analysis of what went wrong and when how these wrongs might be corrected and the challenges for Air Force leadership in the future Now available in paperback The Icarus Syndrome will be of great interest to U S Air Force professionals military and aviation historians and institutional psychologists Assumption-Based Planning James A. Dewar, 2002-10-17 Table of contents **American Defence Annual, 1994** Charles F. Light, John Dumond, 2005-03-24 In 2003 the National Commission on the Public Service chaired by Paul Volcker issued a report detailing problems within the federal government today and recommending changes in its organization leadership and operations This book suggests practical ways to implement the recommendations and defines a research agenda for the future Thirteen essays address the primary problem areas identified by the Volcker Commission and the commission report itself is included Velocity Management John Dumond, 2001 Velocity management brought a new way of doing business to U S Army logistics with a renewed focus on the Army customer and an approach for process improvement that cuts across time quality and cost The authors reveal the motivations methodology and management structure behind the initiative the process improvements that have led to such quick and impressive results and the steps that have been taken to develop and institutionalize the capabilities needed to achieve and sustain future improvement Lessons learned can be readily adapted for other business models Issue Paper ,1993 **Global Reach--global Power** Barbara J. Faulkenberry, 1996 The analysis presented in this thesis evaluates the contents of past Air Force strategic vision documents and studies the process used to create such documents The thesis argument is that

strategic vision document can fulfill important functions for an organization and that greater attention to the process of creating these documents can result in a more effective final product The author defines a strategic vision document as a formal written product endorsed by the organization s senior leader that provides broad and motivational guidance for the organization in the present while providing sage direction for the future Based on current literature addressing the subject the author proposes a framework of three attributes and two functions for strategic vision statements The attributes of such statements are a declaration of organizational identity a disclosure of future goals and a view of the methods by which goals will be met The two functions of strategic vision are to unify internally and advocate externally Within this framework the author examines three past Air Force strategic vision documents for content and details the known processes behind their creation and distribution General Arnold s 1945 report *Air Power and the Future* the 1990 White Paper *The Air Force and US National Security* Global Reach Global Power and the 1992 White Paper *Global Reach Global Power The Evolving Air Force Contribution to National Security* Additionally the author discusses the processes involved in two other official works *Global Presence* and the on going efforts aimed at creating a new Air Force strategic vision **Airpower Journal** ,1998
