

The background is a detailed illustration of a campfire. A large, bright orange and yellow flame rises from a pile of logs. The ground is covered with a thick layer of autumn leaves in shades of red, orange, and brown. A fishing lure with a silver body and a red and white spinner is visible on the ground near the fire. The overall scene is warm and inviting, suggesting a cozy outdoor setting.

The Curious Case of Dr. Castaneda's Twelve Pages of Field Notes F. Lawrence Fleming, 2023-01-05 My previous book about the author Carlos Castaneda *Making Sense of the Life and Works of Carlos Castaneda* F Lawrence Fleming published 2018 was an attempt to show that although evidence appears to show that Castaneda did actually work with a Yaqui Indian sorcerer the publications concerning his fieldwork were largely fraudulent In this present book I shall attempt to show what sort of person the character don Juan in the books by Carlos Castaneda may have been in real life and how his remarkable personal philosophy can be inferred from what I assert is Castaneda s grossly corrupted version of the teachings of Don Juan in his published works

Cultural Tourism and Identity Keyan Tomaselli, 2012-08-22 Studies of cultural tourism and indigenous identity are fraught with questions concerning exploitation entitlement ownership and authenticity Unease with the idea of leveraging a group identity for commercial gain is ever present This anthology articulates some of these debates from a multitude of standpoints It assimilates the perspectives of members of indigenous communities non governmental organizations tourism practitioners and academic researchers who participated in an action research project that aims to link research to development outcomes

The View from Officers' Row Sherry L. Smith, 1991-02-01 Capturing military men in contemplation rather than combat Sherry Smith reveals American army officers views about the Indians against whom they fought in the last half of the nineteenth century She demonstrates that these officers and their wives did not share a monolithic negative view of their enemies but instead often developed a great respect for Indians and their cultures Some officers even came to question Indian policy expressed misgivings about their personal involvement in the Indian Wars and openly sympathized with their foe The book reviews the period 1848 1890 from the acquisition of the Mexican Cession to the Battle of Wounded Knee and encompasses the entire trans Mississippi West Resting primarily on personal documents drawn from a representative sample of the officer corps at all levels the study seeks to juxtapose the opinions of high ranking officers with those of officers of lesser prominence who were perhaps less inclined to express personal opinions in official reports No educated segment of American society had more prolonged contact with Indians than did army officers and their wives yet not until now has such an overview of their attitudes been presented Smith s work demolishes the stereotype of the Indian hating officer and broadens our understanding of the role of the army in the American West

Mapping the Four Corners Robert S. McPherson,Susan Rhoades Neel,2016-08-04 In 1875 a team of cartographers

geologists and scientists under the direction of Ferdinand V Hayden entered the Four Corners area for what they thought would be a calm summer's work completing a previous survey. Their accomplishments would go down in history as one of the great American surveying expeditions of the nineteenth century. By skillfully weaving the surveyors' diary entries, field notes, and correspondence with newspaper accounts, historians Robert S. McPherson and Susan Rhoades Neel bring the Hayden Survey to life. *Mapping the Four Corners* provides an entertaining, engaging narrative of the team's experiences, contextualized with a thoughtful introduction and conclusion. Accompanied by the great photographer William Henry Jackson, Hayden's team quickly found their trip to be more challenging than expected. The travelers describe wrangling half-wild pack mules, trying to sleep in rain-soaked blankets, and making tea from muddy alkaline water. Along the way, they encountered diverse peoples, evidence of prehistoric civilizations, and spectacular scenery: Hispanic villages in Colorado and New Mexico, Mesa Verde, Hovenweep, and other Anasazi sites, and the Hopi mesas. Not everyone they met was glad to see them in southeastern Utah; surveyors fought and escaped a band of Utes and Paiutes who recognized that the survey meant dispossession from their homeland. Hayden saw his expedition as a scientific endeavor focused on geology, geographic description, cartographic accuracy, and even ethnography, but the search for economic potential was a significant underlying motive. As this book shows, these pragmatic scientists were on the lookout for gold beneath every rock, grazing lands in every valley, and economic opportunity around each bend in the trail. The Hayden Survey ultimately shaped the American imagination in contradictory ways, solidifying the idea of progress and government funding of its pursuit while also revealing, via Jackson's photographs, a landscape with a beauty hitherto unknown and unimagined.
