Early Clinical Exposure in Anatomy - E-Book Anand Reddy, 2024-05-10

In 2019 the National Medical Council (NMC) made many changes to the medical curriculum. The inclusion of Early Clinical Exposure (ECE) was one of the important changes. By including ECE, NMC aims solely at achieving both horizontal and vertical integration in different phases of a medical curriculum. It also targets at developing the students' interest in preclinical subjects at the beginning of the curriculum, which will help strengthen the foundation of their career and produce knowledgeable Indian medical graduates. The book has been written according to the new changes made to the curriculum by the NMC. It will help fulfil the need of the students and adapt themselves to the changes easily as facing new changes is always a challenge for both students as well as teachers. Keeping the NMC's objective in mind, the author has made an effort to impart knowledge in a competency-based and ECE format. This book focuses on explaining the anatomical basis of various disorders in a question-answer format. When the 'why' is clear, the 'how' becomes easy to understand. And when the 'how' becomes easy, the management of a disease also becomes easy. This book will provide guidelines to preclinical students to prepare for clinical-based questions and, considering the vastness of the subject, it can be one of the best tools to revise clinical aspects of various systems of the human anatomy.

Lynne, 2020-11-13 This book presents the Metaeconomics Framework and Dual Interest Theory which weave the empathy based moral and ethical dimension back into key economic questions Metaeconomics addresses the problem of placing too much emphasis on the market or the government and thus argues that seeing the link between ego and empathy self and other interest and market and government will lead to a more just fair and sustainable polity The unique Dual Interest Theory proposes that ego based self interest and empathy based other interest are joint and internal to each person it maintains the original proposition from Adam Smith that each person maximizes their own interest which Metaeconomics makes clear involves balancing the two joint interests although self interest is more primal The book begins with an explanation of how Metaeconomics connects the other kinds of economics The book then provides a series of applications of Metaeconomics in heated policy issues such as elections finance family food health natural resources education taxes and extreme inequality among others Finally the book concludes that the only way to save capitalism is to bring empathy into both private and public actions and bring about a more humane balance in market and government
