Visual Culture and Ideology, 1400-1700** James Hutson,2016-03 The development of art theory over the course of the Renaissance and Baroque eras is reflected in major stylistic shifts In order to elucidate the relationship between theory and practice we must consider the wider connections between art theory poetic theory natural philosophy and related epistemological matrices Investigating the interdisciplinary reality of framing art making and interpretation this treatment rejects the dominant synchronic approach to history and historiography and seeks to present anew a narrative that ties together various formal approaches focusing on stylistic transformation in particular artist s oeuvres Michelangelo Annibale Carracci Guercino Guido Reni Poussin and others and the contemporary environments that facilitated them Through the dual understanding of the art theoretical concept of the Idea an evolution will be revealed that illustrates the embittered battles over style and the overarching intellectual shifts in the period between art production and conceptualization based on Aristotelian and Platonic notions of creativity beauty and the goal of art as an exercise in encapsulating the divine truth of nature Art Theory as Visual Epistemology Harald Klinke,2014-06-26 How can we know What does knowledge mean These were the fundamental questions of epistemology in the 17th century In response to continental rationalism the British empiricist John Locke proposed that the only knowledge humans can have is acquired a posterior In a discussion of the human mind he argued the source of knowledge is sensual experience mostly vision Since vision and picture making are the realm of art art theory picked up on questions such as are pictures able to represent knowledge about the world How does the production of images itself generate knowledge How does pictorial logic differ from linguistic logic How can artists contribute to a collective search for truth Questions concerning the epistemic potential of art can be found throughout the centuries up until the present day However these are not questions of art alone but of the representational value of images in general Thus the history of art theory can contribute much to recent

discussions in Visual Studies and Bildwissenschaften by showing the historic dimension of arguments about what images are or should be. What is knowledge is as much a philosophic question as What is an image. Visual epistemology is a new and promising research field that is best investigated using an interdisciplinary approach that addresses a range of interconnected areas such as internal and external images and the interplay of producer and perceiver of images. This publication outlines this territory by gathering together several approaches to visual epistemology by many distinguished authors.

Art and Art-Attempts Christy Mag Uidhir, 2013-06-27 Christy Mag Uidhir presents a new theory of art. Few philosophers agree about what it is for something to be art but most or all agree that art must be somehow intention dependent. Mag Uidhir shows that this requirement has radical implications for the nature of art and of art forms for the ontology of art and for issues about authorship.

Semiotics and Art Theory Madeleine Schechter, 2008 *The Space that Separates: A Realist Theory of Art* Nick Wilson, 2019-08-23 The Space that Separates: A Realist Theory of Art radically challenges our assumptions about what art is, what art does, who is doing it, and why it matters. Rejecting the modernist and market-driven misconception that art is only what artists do, Wilson instead presents a realist case for living artfully. Art is defined as the skilled practice of giving shareable form to our experiences of being in relation with the real; that is to say, the causally generative domain of the world that extends beyond our direct observation, comprising relations, structures, mechanisms, possibilities, powers, processes, systems, forces, values, ways of being. In communicating such aesthetic experience, we behold life's betweenness: the space that separates so coming to know ourselves as connected. Providing the first dedicated and comprehensive account of art and aesthetics from a critical realist perspective, Aesthetic Critical Realism (ACR), Wilson argues for a profound paradigm shift in how we understand and care for culture in terms of our systems of value recognition. Fortunately, we have just the right tool to help us achieve this transformation, and it's called art. Offering novel explanatory accounts of art, aesthetic experience, value, play, culture, creativity, artistic truth, and beauty, this book will appeal to a wide audience of students and scholars of art, aesthetics, human development, philosophy, and critical realism, as well as cultural practitioners and policy makers.
