## **Airforce Role In Low Intensity Conflict:**

**The Air Force role in low-intensity conflict**, 1986      **The Air Force Role in Low-intensity Conflict** David J. Dean, 1986 Colonel Dean examines the increasing importance of third world countries in global affairs Their vital natural resources and geostrategic locations make them the object of intense competition between the superpowers and a ripe target for a new category of conflict Because of the high probability of US involvement in third world conflicts we must adapt our resources to acquire the flexibility demanded by low intensity conflict      *The Air Force Role in Low-Intensity Conflict* Lieutenant Colonel Usaf David J Dean, USAF, David J., David Dean, Lieutenant , USAF, 2012-08-06 This book grew from an opportunity to study a third world air force fighting an externally supported insurgency The players were the Royal Moroccan Air Force and the Polisario the latter trying to wrest control of the Western Sahara from the Kingdom of Morocco The United States has also been a player in the Morocco Polisario war as the source of much of Morocco's war material especially the weapons used by the Royal Moroccan Air Force Help from the United States was especially important when the Polisario deployed Soviet built SA 6 surface to air missiles to counter the growing effectiveness of the Royal Moroccan Air Force For many reasons the United States and the US Air Force were not able to assist the Moroccans effectively The Morocco Polisario US scenario that provides the basis for this study was a tiny aspect of the US foreign and military policy in the early 1980s But it shows a political military problem that deserves a good deal of thought now That problem simply stated is How is the United States going to exert political military influence in the third world during the next twenty years Clearly overall US influence in the third world will be a combination of political military economic and social activity But the military in many cases will be the most visible form of assistance and one upon which the recipient nation will depend for immediate results Are the military components as instruments of national policy able to act effectively in the third world If not what needs to be done The US Air Force and the other services need to consider the question of effective assistance to third world countries as part of a basic shift in strategic thinking Our primary strategic planning effort has been to insert large numbers of US ground and air forces into an area such as the Persian Gulf to accomplish our policy objectives That planning effort must continue but with the understanding that inserting a major US force in any third world region is extremely unlikely both for domestic political reasons and because potential host nations are reluctant to support large US forces Our primary strategic focus for planning needs to shift to providing effective leverage for third world friends and allies That leverage can be in the form of arms sales training doctrine or even small specialized forces But providing leverage depends on effective planning that builds the data base which allows us to pinpoint the host country's needs and capabilities Developing that kind of expertise in the USAF and in the other services will be a difficult and frustrating long term proposition The Air Force must recognize the need for a change and must act upon it Planning to exert effective political military influence in the third world may not be a glamorous task but it will be the name of the game for the next twenty

years and beyond This book offers some ideas in that regard Journal of Special Operations Medicine ,2009 Airmen and air theory a review of the sources Phillip S. Meilinger,2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America s greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done *Professional Journal of the United States Army* ,1989 *Air Force Magazine* ,2013-07 **Air University Abstracts of Research Reports** ,1986 **Use of Services for Family Planning and Infertility, United States** Gerry E. **The Small Wars of the United States, 1899-2009** Benjamin R. Beede, 2010 The Small Wars of the United States 1899-2009 is the complete bibliography of works on US military intervention and irregular warfare around the world as well as efforts to quell insurgencies on behalf of American allies. The text covers conflicts from 1898 to present with detailed annotations of selected sources. In this second edition Benjamin R. Beede revises his seminal work bringing it completely up to date including entries on the current conflicts in Iraq and Afghanistan. An invaluable research tool. The Small Wars of the United States 1899-2009 is a critical resource for students and scholars studying US military history. *Air Force Report* United States.
