Circle Maureen T. Carroll, Elyn Rykken, 2018-12-20 Geometry The Line and the Circle is an undergraduate text with a strong narrative that is written at the appropriate level of rigor for an upper level survey or axiomatic course in geometry Starting with Euclid's Elements the book connects topics in Euclidean and non Euclidean geometry in an intentional and meaningful way with historical context The line and the circle are the principal characters driving the narrative In every geometry considered which include spherical hyperbolic and taxicab as well as finite affine and projective geometries these two objects are analyzed and highlighted Along the way the reader contemplates fundamental questions such as What is a straight line What does parallel mean What is distance What is area There is a strong focus on axiomatic structures throughout the text While Euclid is a constant inspiration and the Elements is repeatedly revisited with substantial coverage of Books I II III IV and VI non Euclidean geometries are introduced very early to give the reader perspective on questions of axiomatics Rounding out the thorough coverage of axiomatics are concluding chapters on transformations and constructibility The book is compulsively readable with great attention paid to the historical narrative and hundreds of attractive problems **Fivefold Symmetry** Istvan Hargittai, 1992-03-24 Fivefold symmetry is common in flowers fruits molecules logos and buildings but it is a forbidden symmetry in the world of crystals A few years ago the so called quasicrystals were discovered displaying fivefold symmetry and it caused a minirevolution in crystallography There has been increased awareness of fivefold symmetry in all domains of human interest ever since The present book brings together authors and ideas on a common theme from mathematics the sciences design and anthropology to history literature and the arts Its 29 chapters are an offering by scientists and humanists from 13 countries to a broad readership of professionals and laypersons about fivefold symmetry and the areas that are being bridged by this unique concept **Leon Battista Alberti: On Painting** Leon Battista Alberti, 2011-05-09 In this volume Rocco Sinisgalli presents a new English translation and critical examination of Alberti's seminal text **Finding List of Books and Periodicals in the Central Library**, 1890 *Inventing Cinema* Benoît Turquety, 2025-10-01 With machines mediating most of our cultural practices and innovations obsolescence and revivals constantly transforming our relation with images and sounds media feel more unstable than ever But was there ever a stable moment in media history Inventing Cinema proposes to approach this question through an archaeology and epistemology of media machines The archaeology analyses them as archives of users gestures as well as of modes of perception The epistemology reconstructs the problems that the machines designers and users have strived to solve and the network of concepts they have elaborated to understand these problems Drawing on the philosophy of technology and anthropology Inventing Cinema argues that networks of gestures problems perception and concepts are inscribed in vision machines from the camera obscura to the stereoscope the Cinématographe and digital cinema The invention of cinema is ultimately seen as an ongoing process irreducible to a single moment in history **An Opening** Stephanie Radok, 2012 For over twenty years Stephanie Radok has written about and witnessed the emergence of contemporary Aboriginal art and the responses of
