Alchemy Of Prayer Rekindling Our Inner Life:

The Alchemy of Prayer Terry Lynn Taylor, 1996 Loving look at a timeless subject Son Rise Barry Neil Kaufman, 2011-03-10 In 1979 the classic bestseller Son Rise was made into an award winning NBC television special which has been viewed by 300 million people worldwide Now Son Rise The Miracle Continues presents not only the expanded and updated journal of Barry and Samahria Kaufman s successful effort to reach their unreachable child but goes beyond to include a sensitive portrayal of how that singular event has become a worldwide phenomenon When their son Raun was a year old he began to withdraw from human contact Diagnosed as autistic Raun tested with an I Q of under 30 Experts offered no hope and advised institutionalizing him Barry and Samahria refused to accept this prognosis For several years they worked with Raun in a program of their own design based on unconditional love and acceptance By age three and a half Raun was functioning above his age level a bright and curious little person The story of the Kaufmans experience to this point makes up Part I of Son Rise The Miracle Continues Part II continues Raun s story and describes the intervening years as the Kaufmans offered hope and healing to thousands of families with special needs children At age twenty Raun attended a top university and displayed a near genius I Q Today he shows no trace of his former condition Part III of the book highlights the moving stories of five families who guided by the Kaufmans and the Son Rise Program have created rebirths for their own special children **The Publishers Weekly** ,2004 **The Psychological Roots of Religious Belief** Mel D. Faber, 2004

In this insightful new study M D Faber whose previous work on the psychology of religion has won widespread critical acclaim offers a comprehensive naturalistic explanation of religious experience from the intertwining perspectives of neuroscience and developmental psychology Faber here argues that belief in God the powerful sensation of his presence and the heartfelt assent to the reality of the supernatural are all produced by the mind brain s inherent tendency to discover in religious narrative a striking memorial echo of its own biological development Although Faber maintains that we are not wired specifically for God as many contend our brain is so constructed as to make us profoundly susceptible to religious myths These myths encourage us to map our early internalized experience onto a variety of supernatural narratives with the figure of the Parent God and his angelic assistants at the center A key point of Faber s analysis is the connection between the onset of infantile amnesia during childhood s later years and the evocative power of religious mythology Although we cannot explicitly recall our earliest interactions with our parents or other caregivers religious narratives can and do jog these implicit emotional memories in an uncanny way which prompts us to accede to religion s central tenet namely that we are in the care of an omnipotent parental provider who watches over us and ministers to our needs In the final analysis religious experience attempts to recapture and to reinstate in an idealized form the symbiotic union of the early parent child relation This pioneering highly original work takes the reader to the neurological psychological bedrock of religious experience
