Educational Television United States. Congress. Senate. Committee on Interstate and Foreign Commerce,1959 Considers S 12 to authorize Federal grants to public schools colleges and adult training programs for the use and reception of educational television The Magic Behind the Voices Tim Lawson,Alisa Persons,2009-09-28

The Magic Behind the Voices is a fascinating package of biographies anecdotes credit listings and photographs of the actors who have created the unmistakable voices for some of the most popular and enduring animated characters of all time Drawn from dozens of personal interviews the book features a unique look at thirty nine of the hidden artists of show business Often as amusing as the characters they portray voice actors are charming resilient people many from humble beginnings who have led colorful lives in pursuit of success Beavis and Butthead and King of the Hill s Mike Judge was an engineer for a weapons contractor turned self taught animator and voice actor Nancy Cartwright the voice of Bart Simpson was a small town Ohio girl who became the star prot g of Daws Butler most famous for Yogi Bear Huckleberry Hound and Quick Draw McGraw Mickey Mouse Wayne Allwine and Minnie Mouse Russi Taylor were a real life husband and wife team Spanning many studios and production companies this book captures the spirit of fun that bubbles from those who create the voices of favorite animated characters In the earliest days of cartoons voice actors were seldom credited for their work A little more than a decade ago even the Screen Actors Guild did not consider voice actors to be real actors and the only voice actor known to the general public was Mel Blanc Now Oscar winning celebrities clamor to guest star on animated television shows and features Despite the crushing turnouts at signings for shows such as Animaniacs The Simpsons and SpongeBob Squarepants most voice actors continue to work in relative anonymity The Magic Behind the Voices features personal interviews and concise biographical details parting the curtain to reveal creators of many of the most beloved cartoon voices

Science on the Air Marcel Chotkowski LaFollette,2009-08-01 Mr Wizard s World Bill Nye the Science Guy NPR s Science Friday These popular television and radio programs broadcast science into the homes of millions of viewers and listeners But these modern series owe much of their success to the pioneering efforts of early twentieth century science shows like Adventures in Science and Our Friend the Atom Science on the Air is the fascinating history of the evolution of popular science in the first decades of the broadcasting era Marcel Chotkowski LaFollette transports readers to the early days of radio when the new medium allowed innovative and optimistic scientists the opportunity to broadcast serious and dignified presentations over the airwaves But the exponential growth of listenership in the 1920s from thousands to millions and the networks

recognition that each listener represented a potential consumer turned science on the radio into an opportunity to entertain not just educate Science on the Air chronicles the efforts of science popularizers from 1923 until the mid 1950s as they negotiated topic content and tone in order to gain precious time on the air Offering a new perspective on the collision between science's idealistic and elitist view of public communication and the unbending economics of broadcasting LaFollette rewrites the history of the public reception of science in the twentieth century and the role that scientists and their institutions have played in both encouraging and inhibiting popularization By looking at the broadcasting of the past Science on the Air raises issues of concern to all those who seek to cultivate a scientifically literate society today

[A Literary Field Guide to Southern Appalachia](#) Rose McLarney, Laura-Gray Street, L. L. Gaddy, 2019-10-15 Getting acquainted with local flora and fauna is the perfect way to begin to understand the wonder of nature The natural environment of Southern Appalachia with habitats that span the Blue Ridge to the Cumberland Plateau is one of the most biodiverse on earth A Literary Field Guide to Southern Appalachia a hybrid literary and natural history anthology showcases sixty of the many species indigenous to the region Ecologically culturally and artistically Southern Appalachia is rich in paradox and stereotype defying complexity Its species range from the iconic and inveterate such as the speckled trout pileated woodpecker copperhead and black bear to the elusive and endangered such as the American chestnut Carolina gorge moss chucky madtom and lampshade spider The anthology brings together art and science to help the reader

experience this immense ecological wealth Stunning images by seven Southern Appalachian artists and conversationally written natural history information complement contemporary poems from writers such as Ellen Bryant Voigt Wendell Berry Janisse Ray Sean Hill Rebecca Gayle Howell Deborah A Miranda Ron Rash and Mary Oliver Their insights illuminate the wonders of the mountain South fostering intimate connections The guide is an invitation to get to know Appalachia in the broadest most poetic sense **Catalogue of the Brooklyn Library** Brooklyn Public Library,1877 Academic Films for the Classroom Geoff Alexander,2014-01-10 Exploring a realm of film often dismissed as campy or contrived this book traces the history of classroom educational films from the silent era through the 1980s when film finally began to lose ground to video based and digital media It profiles 35 individual academic filmmakers who played a role in bringing these roughly 100 000 16mm films to classrooms across North America paying particular attention to auteur John Barnes and his largely neglected body of work Other topics include the production companies contributing to the growth and development of the academic film genre the complex history of post Sputnik federally funded educational initiatives which influenced the growth of the academic film genre and the denouement of the genre in classrooms and its resurgence on the Internet **Science on American Television** Marcel Chotkowski,2024-05-31 As television emerged as a major cultural and economic force many imagined that the medium would enhance civic education for topics like science And indeed television soon offered a breathtaking banquet of scientific images and ideas both factual and fictional Mr Wizard performed experiments with milk bottles Viewers watched live coverage of solar eclipses and atomic bomb blasts Television cameras followed astronauts to the moon Carl Sagan through the Cosmos and Jane Goodall into the jungle Via electrons and embryos blood testing and blasting caps fictional Frankensteins and chatty Nobel laureates television opened windows onto the world of science But what promised to be a wonderful way of presenting science to huge audiences turned out to be a disappointment argues historian Marcel Chotkowski LaFollette in *Science on American Television* LaFollette narrates the history of science on television from the 1940s to the turn of the twenty first century to demonstrate how disagreements between scientists and television executives inhibited the medium s potential to engage in meaningful science education In addition to examining the content of shows she also explores audience and advertiser responses the role of news in engaging the public in science and the making of scientific celebrities Lively and provocative *Science on American Television* establishes a new approach to grappling with the popularization of science in the television age when the medium s ubiquity and influence shaped how science was presented and the scientific community had increasingly less control over what appeared on the air
