Hermann,1998-06-03 To find more information about Rowman and Littlefield titles please visit www.rowmanlittlefield.com *Small States and the European Migrant Crisis* Tómas Joensen,Ian Taylor,2021-04-26 This edited book examines the experience of small states in Europe during the 2015 2016 migration crisis The contributions highlight the challenges small states and the European Union faced in addressing the massive irregular flow of migrants and refugees into Europe and the Schengen Area Small states adopted a number of coping strategies and proved relatively effective in navigating the storm they faced Externally they pursued strategies of shelter seeking hiding hedging and norm entrepreneurship while domestically they tended to securitize migration and to pursue scapegoating by blaming the EU and other states for the nature and magnitude of the crisis During this crisis management their small administrations proved resilient and flexible in their responses despite suffering from limited resources and being subject to the shifting preferences of stronger actors This book shows that independent of whether we view the migration crisis as a crisis for the European Union or Europe as a whole or how we interpret the intensity and severity of the crisis this was a crisis for small states in Europe The crisis disrupted the liberal and institutionalized order upon which small states in the region had increasingly based their policies and influence for more than 60 years **Winning the Un-war** Charles V. Peña,2007 According to President Bush the American people are safer as a result of invading Iraq True Saddam Hussein has been removed from power But al Qaeda the group that planned and carried out the attacks on September 11 remains at large Meanwhile the White House has conceded that Saddam Hussein had nothing to do with the attacks Charles Peña argues that

the war in Iraq is but one misstep in the Bush administration's global war on terror. Terrorism is simply a tactic, however, not an enemy. Trying to eradicate it is a quixotic quest that does not focus on those responsible for 9/11. Instead, the national security strategy should consist of three central elements: establishing homeland security against further attacks, dismantling the al Qaeda terrorist network, and enacting a foreign policy that does not attract new al Qaeda terrorists. This approach requires restructuring U.S. forces and ending Cold War era commitments that distract from the current pressing threat. It also requires ameliorating the negative consequences of an interventionist U.S. foreign policy which creates incentives and opportunities for terrorists to target the United States. If we misdiagnose al Qaeda's motivations or focus military efforts on the wrong targets, then we run the risk that the war against the al Qaeda terrorist threat and the radical Islamic ideology it represents will become a broader war against the Islamic world that could last generations and cost countless lives.

With a foreword by Michael Scheuer, the bestselling author of *Imperial Hubris: The Altered Strategic Environment* (Peter DeLeon, 1987) and *India as an Emerging Power* (Sumit Ganguly, 2004-11-23). These essays examine India's relations with key powers including the Russian Federation, China, and the USA, and with key adversaries in the global arena in the aftermath of the Cold War. One positive relationship is that of India's relations with Israel since 1992.

Pakistan's Nuclear Policy
Zafar Khan, 2014-07-17

In May 1998, in reaction to India's nuclear weapons tests, Pakistan tested six nuclear weapons. Following this, the country opted for a policy of minimum deterrence, and within a year, Pakistan had altered its policy stance by adding the modifier of minimum credible deterrence. This book looks at how this seemingly innocuous shift seriously impacted on Pakistan's nuclear policy direction and whether the concept of minimum has lost its significance in the South Asian region's changed strategic environment. After providing a brief historical background, exploring why and how Pakistan carried out the nuclear development program, the book questions why Pakistan could not sustain the minimum deterrence that it had conceptualized in the immediate aftermath of the 1998 test. It examines the conceptual, theoretical framework of the essentials of minimum deterrence in order to question whether Pakistan's nuclear policy remained consistent with this, as well as to discover the rudimentary factors that are responsible for the inconsistencies with regard to minimum deterrence conceived in this study. The book goes on to look at the policy options that Pakistan had after acquiring the nuclear capability and what the rationale was for selecting minimum deterrence. The book not only highlights Pakistan's deterrent force building but also analyzes closely Pakistan's doctrinal posture of first use option. Furthermore, it examines the policy towards arms control and disarmament and discusses whether these individual policy orientations are consistent with the minimum deterrence. Conceptually providing a deeper understanding of Pakistan's post-1998 nuclear policy, this book critically examines whether the minimum deterrence conceived could be sustained both at the theoretical and operational levels. It will be a useful contribution in the field of Nuclear Policy, Security Studies, Asian Politics, Proliferation, Non-Proliferation Studies, and Peace Studies. This book will be of interest to policy makers, scholars, and students of nuclear policy.

nuclear proliferation and arms control related research **Parameters** ,1979 **Superpower Britain** Ashley Jackson,Andrew Stewart,2025-01-13 History tells us that the Second World War broke Britain as a great power diminishing its military strength ruining its economy and precipitating a striking wave of decolonization Nationalists and new superpowers dominated the post war landscape and the country was on the slide But no one knew this in 1945 the leading politicians the top civil servants and the most knowledgeable experts all expected the British Empire to remain intact long into the future There was no hint of imminent collapse and the governing elite and key opinion shapers weren't considering decline and decolonization evincing instead a new zeal for imperial renovation and a belief that an empire which had just survived another global conflict was vital for the peace and security of all humankind They were even looking to expansion securing the spoils of victory as they had done at the end of the First World War Fully expecting to continue leading a great empire as well as a bloc of European nations recovering from war the British had their own vision of the new world order Furthermore and astonishingly given what actually happened British leaders were convinced that parity could be gained with the Americans and the Soviets Britain was to remain a superpower in its own right What actually happened differed radically from these expectations The question is how do we account for the difference between what it was thought would happen and the actual course of events **Superpower Britain** is the first book to focus in depth on this fascinating counterpoint and to fully integrate the history of Britain and the effects of the Second World War with the history of the British Empire It explains what the British planned to do in the post war world why they thought their plans for regeneration and the future world order were viable and what the war had actually done to British world power and its imperial foundations *Caribbean Economies and Global Restructing* Marie-Claude Dorné,Keith Nurse,2002-01-01 The papers in this volume address the challenges faced by small economies of the Caribbean by requirements to reduce tariff barriers the demise of preferential market access to North America and Europe and the rapid decline in overseas development assistance **Voting at the Political Fault Line** Bruce Cain,Elisabeth Gerber,2002-03-28 California's adoption of the blanket primary in 1996 presented a unique natural experiment on the impact that election rules have on politics Billed as a measure that would increase voter participation and end ideological polarization Proposition 198 placed California voters once again on the frontier of political reform Employing a variety of data sources and methodologies the contributors to **Voting at the Political Fault Line** apply their wide ranging expertise to understand how this change in political institutions affected electoral behavior and outcomes This authoritative study analyzes the consequences of California's experiment with the blanket primary including the incidence of motivations behind and persistence of crossover voting the behavior of candidates and donors the effects on candidate positions and party platforms and the consequences for women minorities and minor party candidates Published in association with the Institute of Governmental Studies University of California Berkeley **A Year Since the Return of History: A New Cold War** Richard Sakwa,Li Bennich-Björkman,Ziya Öniş,Nicolai N. Russell, Sırma Altun, Emre Demir, Greg Simons, Jonathan Beloff, Oğul Tuna, Luca Cinciripini, Gün Ünal, Aybars Arda Kılıçer, Enes Özcan, Shovkat Jabarova, Ali Demircioğlu, 2023-03-01 The last one year proved itself to be a very tough year and it brought many new challenges for the international relations. Among these new challenges the most striking one is probably the Russia's unleashing a war of aggression on Ukraine. As Russia's invasion stepped up on the 24 February 2022 many Western experts and policymakers predicted that the Ukrainian armed forces wouldn't be able to defend Kyiv and that it would fall to the invaders before the month ended. Nonetheless the government and people of Ukraine are still fighting and you can see evidence of this everywhere you walk in Kyiv thanks to the flag of free Ukraine flying from rooftops. It is clear that we are entering a new era in international relations one that has revived the horrors and catastrophes of the past and paved the way for The Return of History regardless of the outcome of the conflict in Ukraine. Now that a full year has passed since the beginning of the attack TPQ has devoted this issue to exploring the implications of the Russian invasion of Ukraine on many spheres ranging from energy security to agriculture. At the same time we are raising the question of whether the current era deserves to be classified as the new Cold War. If so who are the competing parties and in what ways is this new Cold War differs from the one that ended in 1991 with the United States and the liberal world emerging victorious. To come up with sufficient and informative answers for these critical questions we assembled a large number of extremely valuable articles written by eminent researchers, policymakers, journalists and young experts. All around the world from the United States to Russia and from Türkiye to Sweden manuscripts came in from our contributors. Hence it is with great pleasure that we provide you with this very qualified issue which investigates several facets of the emerging global order from an international perspective. Professor Richard Sakwa investigates the causes of the resurgence of the Cold War and examines the differences between it with the original confrontation. He thinks the Cold War mentality is once again ruling world relations. These arguments suggest that the hope that the conclusion of the Cold War in 1989 would usher in a more universal and permanent peace has largely been disproved. Instead by 2014 the centennial of the beginning of World War I Europe was once again in the grips of bloody war. The United States and the rest of the Political West as it had been reshaped by the Cold War remained on one side. On the other hand he claims that a considerably diminished Russia has replaced the defunct Soviet Union and that this is happening alongside a China that is determined to regain its great power position. Professor Li Bennich Björkman argues that Russia is using bombings, attacks and cruelty to obliterate Ukraine's history. As a result she sees the current conflict as a struggle to maintain the recollection of what a peaceful Ukraine looked like, smelt like, tasted like and felt like. She contends that a split between Russia and Ukraine is inconceivable for Putin because of Ukraine's strategic importance to Russia. Ukrainian President Leonid Kravchuk understood this as early as 1991. She says that he and other Ukrainian leaders sought to defend Ukrainian territory while assuring Moscow that amicable ties remained a possibility. Russia she complains has never undergone a comparable transformation. Professor Ziya Ni who believes that we are in the

midst of a Neo Cold War focuses more on the conflict between the West and the Rest He claims that the clash between democratic and authoritarian capitalism the defining conflict of the new era was exacerbated by Russia s invasion of Ukraine According to him the concerted effort of Western nations to end the conflict was evidence of the resurgence of the democratic club of Western governments and their allies G7 plus He also argues that a significant schism in opinion has developed between the West and the Rest as a direct result of the War He claims that the Russian War in Ukraine ushers in a new era in the post Western world one in which territorial conquests are accepted as the norm setting the path for more armed clashes in a globe already riven by war Professor Nicolai N Petro maintains that the healing of the Ukrainian people is often forgotten among the numerous conflicting narratives that drive the war in Ukraine He argues that this is because the West is ignoring the Other Ukraine whose dissatisfaction with the actions of the Ukrainian government since 2014 has stoked tensions According to him the West s reaction to Russia s incursion has focused on punishing Moscow but hasn t done anything to ease the tensions within Ukraine His work indicates that permanent societal harmony in Ukraine and peace in Europe can be achieved only via reconciliation inside Ukraine We encourage you to learn more about A Year Since the Return of History A New Cold War On behalf of Transatlantic Policy Quarterly I would like to express my gratitude to all the contributors who committed a significant amount of effort and work The TPQ team has had a great time putting together this special issue An important acknowledgment goes to our premium corporate sponsor T pra In addition we would like to thank our online sponsor and the sponsor of this issue Monaco Economic Board We also like to thank our other sponsors Gordon Blair Halifax Kalekim TEB The Ritz Carlton and Uluslararas li kiler Dergisi for their ongoing support Inclusion, Exclusion and the Governance of European Security Mark Webber, 2013-07-19 How inclusive are NATO and the EU Recently enlargement s limits have increasingly come to be recognised bringing with it an important debate on the balance to be struck between inclusion and exclusion This book examines that sometimes awkward balance **Science and technology the making of the Air Force Research Laboratory**, 2000 This history documents a watershed event within the United States Air Force the creation of the Air Force Research Laboratory AFRL As the high technology service the Air Force has always searched for ways to continuously improve its science and technology enterprise In that context the making of AFRL was not a bureaucratic accident Rather it was the product of a complex mixture of historical forces and pressures at work that convinced people at all levels that the time was ripe to bring about fundamental reform in how the Air Force conducts its business of science and technology In terms of significance a wealth of past studies has focused on almost every aspect of the operational side of the Air Force But there has been a scarcity of available scholarly studies that address the far reaching implications of science and technology This book is a major contribution that helps fill that gap Organization and infrastructure are critically important components of the total science and technology picture Thus the manner in which its laboratory system is organized is a critical factor in the Air Force s ability to assure that it is investing in and delivering the

most relevant technologies possible This book documents how the Air Force moved from 13 separate labs to one consolidated lab The narrative is divided into two parts Part one addresses the reasons why the Air Force decided to consolidate its far flung science and technology enterprise into one lab How the new lab was implemented is the focus of part two This study is especially revealing because the reader is given access to the inner workings and struggles of a major Air Force organizational restructuring through interviews with key individuals who participated directly in the decision making process to establish a single lab A chronology of the lab s creation is included 19 tables 22 figures 19 photographs Peace & Freedom Ted Galen Carpenter, 2002 Previously published essays on a wide range of subjects by

Altered Strategic Environment: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have enthralled audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Altered Strategic Environment : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
