Alternative Management Systems for Fisheries David Symes, 1999-03-19 The approach of a new millennium provides a suitable opportunity to reassess existing management systems and to seek out more appropriate systems for the future The debate which is initiated by the reform of the Common Fisheries Policy in 2002 is likely to prove wide ranging As a contribution to the debate this book focuses on the need for institutional change in order to accommodate new policy objectives new stakeholders and new regulatory measures Alternative management systems are examined at different levels from the regionalisation of the CFP through coastal state participation in the management of local fisheries Issues of integrated fisheries management are explored through a number of approaches including ecosystem management the Marine Stewardship Council and integrated coastal zone management Several Contributions focus on alternative means of controlling fishing effort and their enforcement *The Fisheries Co-management Experience* Douglas Clyde Wilson, Jesper Raakjaer Nielsen, Poul Degnbol, 2013-03-09 For two decades the idea of governments and fishers working together to manage fisheries has been advocated questioned disparaged and most importantly attempted in fisheries from North and South America through Europe Africa Asia and Oceania This book is the first time these experiences have been pulled together in a single volume summarized and explained The Fisheries Co management Experience begins with a review of the intellectual foundations of the co management idea from several professional perspectives Next fisheries researchers from six global regions describe what has been happening on the ground in their area Finally the volume offers a set of reflections by some of the best authors in the field The end result describes both the state of the art and emerging issues for one of the most important trends in natural resources management

Sustainable Fishery Systems Anthony Charles, 2008-04-30 This book provides a comprehensive attempt to adopt an integrated interdisciplinary approach to the study of fisheries Fisheries are discussed as holistic systems with emphasis on their structure operation and dynamics The book's interdisciplinary approach is applied to an analysis of problems faced in pursuing sustainable fisheries with emphasis on six dominant themes sustainability uncertainty complexity conflict fishing rights and the nature of management Within this discussion several major directions in current fishery thinking are explored notably the precautionary approach the ecosystem approach co management and robust management for resilient fisheries

**Use of Property Rights in Fisheries Management** Ross Shotton, 2000-01-01 The session was closed with papers that provided a prognosis on the future development of property rights in fisheries management Thus the conference papers addressed the theory and application of property

**Participation in Fisheries Governance** Tim S. Gray, 2006-06-30 The chapters focus on three main themes first what value does stakeholder participation bring to fisheries governance Its advocates claim that participation improves the quality of decision making resolves conflicts and increases compliance with regulations On the other hand critics argue that

participation is often unnecessary ineffective costly time consuming and cosmetic The second theme is the relationship between the participatory mode and the current switch from single species based fisheries management to the ecosystem based approach EBA In what way does widening the extent of public participation contribute to the EBA Third is the vexed question of the relationship between fishers experiential knowledge and fisheries science how far does fishers knowledge improve our understanding of the marine environment The central message of the book is that while stakeholder participation is beneficial it carries with it responsibilities as well as rights all stakeholders have a public duty to act as stewards for the marine environment Evolving Approaches to Managing Marine Recreational Fisheries Donald

Leal,Vishwanie Maharaj,2009-01-01 Each year thirteen million anglers enjoy the sport of saltwater angling in the United States generating an estimated 30 billion in sales and supporting nearly 350 000 jobs Recreational saltwater fishing however can significantly impact species of concern species overfished or experiencing overfishing Traditional angling controls bag and size limits and restricted seasons have fallen short in controlling fishing impacts and reducing conflicts among fishing and non fishing interests Evolving Approaches to Managing Marine Recreational Fisheries offers ways of overcoming such problems while providing anglers and the recreational service industry greater regulatory flexibility to enjoy the fruits of sportfishing It features fourteen internationally recognized fishery experts presenting the pros and cons of using individual fishing quotas IFQs game tags and angler management organizations AMOs in managing marine recreational fisheries presenting both theoretical and practical solutions to help move recreational fisheries management to a new and improved level A Fishery Manager's Guidebook Kevern L. Cochrane,Serge M. Garcia,2009-06-15 Co published with the Food and

Agriculture Organization of the United Nations Fisheries management is the process that has evolved to try to ensure that fisheries operate in a manner that provides the immediate benefits in a sustainable manner The widely accepted goal is that the full range of benefits should not only be available for this generation but for generations to come Fisheries management has been successful in some cases but there have also been many many cases of failure This volume is intended to contribute to improving this unsatisfactory state by addressing the widespread need for information and guidance on the broad and often complex task of fisheries management It is an updated and expanded edition of the first version of A fishery manager s guidebook which was published as a FAO Fisheries Technical Paper in 2002 The major part of this new edition is divided into five parts intended to cover the range of concerns tools and techniques essential to the modern fisheries manager whether that manager is an individual or a formal or informal group Following the Introduction Part I examines the primary dimensions of fisheries biological ecological social and economic Part II looks at the legal and institutional characteristics of fisheries Part III explores the tools that fishery managers have to achieve the objectives expected from a fishery Part IV discusses the role of scientific information of indicators and reference points Part V moves into implementation of fisheries management and includes a chapter on special considerations in small scale fisheries This landmark publication is aimed at

fishery managers and scientists All libraries in research establishments and universities where fisheries and aquatic sciences are studied and taught will need copies of this important volume Fisheries around the world make essential contributions to human well being including the provision of basic food supplies employment recreational opportunities foreign currency and others providing benefits to hundreds of millions of people Despite these benefits our record of managing fisheries so that the benefits can be sustained has been poor at best and most fisheries around the world are experiencing serious ecological social or economic problems and usually all three Today there is global concern about the state of fishery resources and aquatic ecosystems their resilience to future stresses such as climate change and their ability to continue to provide benefits

**Review of Fisheries in OECD Countries: Policies and Summary Statistics 2003** OECD,2003-07-23 Describes major developments affecting fisheries in OECD countries including changes in government policies trade and fisheries and aquaculture production This edition contains a special chapter on economic and social sustainability indicators for fisheries

*The Knowledge Base for Fisheries Management* Lorenzo Motos,Douglas Wilson,2006-08-18 Fisheries are in a state of crisis throughout the world While there has been some success truly effective fisheries management seems beyond our grasp The knowledge needed for proper management contains a broad array of facts and connections from statistical stock assessments to the information that allows government agencies to track compliance with rules and beyond This book describes the state of the art knowledge about fishery systems Seldom seen in a scientific publication regarding fisheries science this book presents a multidisciplinary perspective of fisheries management Leading fisheries scholars with backgrounds in biology ecology economics and sociology ask how management institutions can learn and put their lessons to use The Knowledge Base for Fisheries Management offers a unique overview of the world of fisheries management and provides the background to draw conclusions of what is needed to improve management Covering a wide range of regimes case studies and professional perspectives this publication will be an obliged reference to anyone involved on fisheries management assessment policy making or fisheries development all over the world The only book on the market that analyzes fisheries in a biological sociological and economic way Fills a gap focusing not only on the production of knowledge for fisheries management but also on how it is used in all steps of the management system and the decision making processes Focuses on the hot topic scientific knowledge and society science based policies Documents disseminated research from many different management systems both European and world wide

Implementing and Enforcing European Fisheries Law Astrid Berg,2023-09-20 Within the European Union overfishing overcapacity and non compliance with the system of catch quotas are threatening the very existence of some fisheries resources In dealing with these problems the Common Fisheries Policy CFP has developed into one of the most regulated areas of the European Union Yet in order to provide for the necessary implementation and enforcement frameworks the European Union strongly relies on the Member States a reliance on fifteen different legal systems with different regulatory capacities different legal traditions and different

enforcement systems of criminal law administrative law private law or disciplinary law Implementing and Enforcing European Fisheries Laws focuses on the legal and practical problems of the implementation and enforcement of the EU's catch quotas in a shared legal order It examines in detail how effective enforcement can be achieved in a process of European integration A distinctive feature of this book is the attention given to the trend towards sectoralization whereby management and enforcement responsibilities are shared between the central government and organisations representing fishermen To what extent does sectoralization affect traditional systems of public law enforcement What does resort to the fishing sector itself mean for the degree of legal control Member States exercise over these systems The book is divided into three sections Part One examines the Community law context Part Two investigates implementation and enforcement in the Netherlands and the United Kingdom and analyzes the effectiveness of the existing regulatory frameworks and the systems of criminal administrative and disciplinary law used to enforce the fisheries laws and regulations Part Three compares the national systems in the light of European law requirements and the protection of individual rights The book concludes with the future of fisheries enforcement and considers the potential changes in enforcement The study is of importance for the future role of the CFP and its possible effects on national implementation and enforcement More generally the book reveals the shifting distribution of responsibilities between the Community and the national institutions and actors involved and shows many of the possibilities for and the limits of regulatory enforcement in a setting of European integration

*The Politics of Fishing* Tim S. Gray, 2016-07-27 A topical and authoritative examination of the current crisis in the fishing industry offering a political analysis of the reasons for the crisis and suggesting ways in which this might be overcome The contributors include fishery officials and scientists as well as academics The focus is mainly on the European fishing industry with issues including political bargaining in the EU the working of quota arrangements the status of marine scientific knowledge and the industry's management structures in different countries

**Fishing Europe's Troubled Waters** David Symes, 2023-03-31 Spanning the last 50 years of fisheries policy in Europe this book is the parting contribution and career spanning reflection from one of Europe's most renowned social scientists working in the field of fisheries management and policy The last 50 years have without doubt been the most turbulent years in the history of North Atlantic fisheries a turbulence brought about by the actions of fishers scientists and above all politicians It is a period of change that sees a radical redrawing of the political geography of fisheries globalisation of trade the development of fisheries management towards increasingly restrictive regulation and declining fish stocks The book explains why the bold but deeply flawed Common Fisheries Policy persistently failed to deliver its basic goal of sustainable fisheries The spotlight falls on the monolithic highly centralised command and control nature of the Policy that strives to apply a universal one size fits all approach thus creating a governing system wholly unsuited to the system to be governed out of kilter with preferred models of governance and disconnected from the practical realities of fishing as a livelihood in a challenging environment A final

section on Brexit focuses on its halting progress from concept to reality the implications for the fisheries sector and the fateful final negotiations with the EU over the fisheries question Seeking to explain why the anticipated benefits for the UK industry failed to materialise attention is drawn to the misplaced political hubris over regaining sovereignty in areas like the North Sea This book will be essential reading for students scholars professionals and policymakers working on fisheries marine governance natural resource management environmental policy and the European Project Using Market Mechanisms to Manage Fisheries Smoothing the Path OECD,2006-04-04 This study demystifies the concept of market like instruments in order to help policy makers make better use of market like instruments in fisheries management **Case Studies on the Allocation of Transferable Quota Rights in Fisheries** Ross Shotton,Food and Agriculture Organization of the United Nations,2001-01-01 This report contains 23 studies which examine the initial allocations of transferable fishing quotas by a variety of fisheries management regimes The case studies include accounts from the UK the Netherlands Iceland Canada United States South Africa Australia and New Zealand **Salmon** S. Shaw,J.F. Muir,2012-12-06 with the issues involved in the management of salmon fishing farming and ranching and the implications for production costs and the availability of supplies Chapters 6 and 7 investigate processing marketing and distribution and Chapter 8 discusses the workings of salmon markets and the main factors affecting the demand for salmon Finally chapter 9 summarises the main findings of the study and considers the issues likely to define the future of the industry The main interest of the book is in salmon sold commercially and mention is only made in passing of the rather different though important issues involved in the management of sport or recreation fisheries This book does not cover all species of salmon but concentrates on the main species of current commercial significance These are the five commercially important species of Pacific salmon all of which belong to the single separate genus *ONCORHYNCHUS* together with *SALMO SALAR* the Atlantic salmon The related *SALMO GAIIRDNERI* rainbow trout and *SALMO TRUTTA* brown trout/ sea trout are outside the scope of the book although since these compete closely with salmon the relationship is discussed 1 2 THE SALMON LIFE CYCLE AND SPECIES The family salmonidae is indigenous to the Northern Hemisphere and is found from the temperate zone northwards to beyond the Arctic Circle 1n both Pacific and Atlantic waters They are not native to the Southern Hemisphere but have been successfully introduced into New Zealand into Argentina Venezuela and more recently Chile and the Kerguelen Islands Programmatic Supplemental EIS for Alaska Groundfish Fisheries Implemented Under the Authority of the Fishery Management Plans for the Groundfish Fishery of the Gulf of Alaska and the Groundfish of the Bering Sea and Aleutian Islands Area ,2004

**Comparative Evaluations of Innovative Fisheries Management** Kjellrun Hiis Hauge,Douglas Clyde Wilson,2009-09-23 Comparative Evaluations of Innovative Fisheries Management begins with a look at four places outside the European Union known for innovative management New Zealand Nova Scotia Alaska and Iceland Then the focus shifts to the success criteria related to specific disciplines including biological and social robustness economic efficiency and impacts

on management costs Hypotheses are tested using data capable of generating useful results The main conclusions include a retrospective of how key concepts defined and represented the various perspectives skills and backgrounds that made up the multidisciplinary CEVIS project *Fish and wildlife miscellaneous* United States. Congress. House. Committee on Merchant Marine and Fisheries. Subcommittee on Fisheries and Wildlife Conservation and the Environment,1985 **Interactive Governance for Small-Scale Fisheries** Svein Jentoft,Ratana Chuenpagdee,2015-05-30 Drawing on more than 30 case studies from around the world this book offers a multitude of examples for improving the governance of small scale fisheries Contributors from some 36 countries argue that reform transformation and innovation are vital to achieving sustainable small scale fisheries especially for mitigating the threats and vulnerabilities of global change For this to happen governing systems must be context specific and the governability of small scale fisheries properly assessed The volume corresponds well with the Voluntary Guidelines for Securing Sustainable Small Scale Fisheries adopted in 2014 spearheaded by the United Nations Food and Agriculture Organization FAO These affirm the importance of small scale fisheries for food security nutrition livelihoods rural development and poverty reduction The book arises from the project Too Big To Ignore Global Partnership for Small Scale Fisheries Research TBTI A nuanced diverse vibrant and local specific collection of essays just as the small scale fisheries around the world dealt with by this versatile array of authors Following on the heels of the recently adopted FAO Small Scale Fisheries Guidelines here is an erudite compendium which I heartily recommend to policy makers academics and activists who wish to come to terms with the complex issue of governance of this important field of human activity John Kurien Founding Member of the International Collective in Support of Fishworkers ICSF and Former Professor Centre for Development Studies Trivandrum India Likely to become a classic in its field this book is about small scale fisheries and interactive governance governance which is negotiated deliberated upon and communicated among stakeholders who often share governing responsibilities The authors show that interactive governance is not just a normative theory but a phenomenon that can be studied empirically here with 34 case studies from as many countries around the world north and south east and west Such force of example enables the editors to put together well developed arguments and sometimes surprising conclusions about the way ahead A must read for managers practitioners stakeholders and students Fikret Berkes University of Manitoba Canada and author of *Coasts for People*
